ESTIMATED COST, \$ 1000  
 \_\_\_\_\_  
 Plans must be submitted. Owner or Owner's Representative.

1. The first step in the process of identifying a problem is to define the problem. This involves identifying the symptoms and the underlying causes of the problem.

2. The second step is to gather information about the problem. This involves collecting data and identifying the resources available to solve the problem.

3. The third step is to generate possible solutions. This involves brainstorming and identifying potential solutions to the problem.

4. The fourth step is to evaluate the solutions. This involves comparing the solutions and identifying the most effective one.

5. The fifth step is to implement the solution. This involves putting the chosen solution into action and monitoring its progress.

6. The sixth step is to evaluate the results. This involves assessing the effectiveness of the solution and identifying any areas for improvement.

7. The seventh step is to communicate the results. This involves sharing the findings of the problem-solving process with others.

8. The eighth step is to reflect on the process. This involves thinking about what was learned from the experience and how it can be applied to future problems.

9. The ninth step is to document the process. This involves recording the steps taken and the results achieved.
