City Council
Sacramento, California

Honorable Members in Session:

SUBJECT: Approval of Plans & Specifications and Request for Bids
For Sandblasting American River & Sacramento River
Water Treatment Plants

SUMMARY

The Division of Water & Sewers has prepared plans & specifications for the subject project. It is recommended that the plans and specifications be approved and the project advertised for bids.

BACKGROUND

Part of maintaining buildings is a continuous process of repainting every few years. In an effort to reduce ongoing maintenance costs, the Division started sandblasting concrete structures and not repainting. The bare concrete surfaces are aesthetically pleasing and require little or no maintenance. The Division has completed the sandblasting of the three concrete elevated storage tanks and the Sacramento River Water Treatment Plant Pumping Station. This project will include sandblasting the headhouse and filter building at the SRWTP and the Administration Building and the grit basin at the American River Water Treatment Plant.

FINANCIAL DATA

The project is included in the 1979/80 Water Production Budget 4-13-3020-0000-4241. The estimated cost for this project is \$25,000.

RECOMMENDATION

It is recommended that plans and specifications be approved and that bids be received on May 20, 1980.

Respectfully submitted,

APPROVED
BY THE CITY COUNCIL
