# EXB Series

## Fire Alarm Bells

### 4 Wire Version with Varistor Suppression

The EXB series bells are conventional type two coil assembled vibratory bells that comply with the new UL Standard 464 for 4 wire installation.

A special feature of the EXB series bells is the VARISTOR SUPPRESSION ELEMENT assembled between the coils to reduce RFI and back EMF noise problems. The reduction of the RFI and back EMF noise problems are essential in today's highly integrated control panels.

The two coil vibrator produces a low current power consumption with high sound output.

All DC bells are polarized for use in supervised fire alarm systems and are provided with 4 lead wires.

The base is cast aluminum and completely encloses the bell mechanism.

The EXB bell can be mounted on either a 4" standard electrical box or weatherproof back box, BBX-1 or BBX-4, for outdoor use.

■ SUPPRESSION CIRCUIT EXB-6-PV
