Honorable Members In Session:

SUBJECT: 13th Street Sewer Rehabilitation Between J Street and L Street (PN:XXXX); K Street Sewer Replacement Between 12th Street and 13th Street (JN:9965) (PN:XXXX) - Establish New Capital Improvement Program Project and Fund Transfer

SUMMARY

Evaluation of the City's existing underground utilities in the project area indicates that sewer rehabilitation work is needed and should be constructed prior to construction of the proposed surface improvements associated with the Hyatt Hotel project. The establishment of two new Capital Improvement Program projects and approval of fund transfers are recommended. This item was considered by the Budget and Finance Committee at its meeting of January 19, 1988.

BACKGROUND

See attached report to the Budget and Finance Committee.

FINANCIAL

SUBJECT: 13th Street Sewer Rehabilitation Between J Street and L Street
(PN:XXXX); K Street Sewer Replacement Between 12th Street and 13th
Street (JN:9965) (PN:XXXX) - Establish New CIP Projects and Approve
Fund Transfers

SUMMARY

Evaluation of the City's existing underground utilities in the project area indicates that sewer rehabilitation work is needed and should be constructed prior to construction of the proposed surface improvements associated with the Hyatt Hotel project. The establishment of two new Capital Improvement Program projects and the approval of the necessary fund transfers are recommended.

BACKGROUND

As part of plan review for the sidewalk and mall improvements surrounding the Hyatt Hotel staff reviewed the condition of existing City utilities. Based on this evaluation of the City's utilities in the vicinity of the K Street Mall and 13th Street, staff has determined a need for sewer rehabilitation. The Flood Control and Sewer Division has recommended replacement of the 15-inch sewer in K Street between 12th and 13th Streets and rehabilitation of the 24-inch brick sewer in 13th Street between J and L Streets. These two lines must be replaced prior to construction of the sidewalk and mall surface improvements if construction damage to those new facilities is to be avoided. In order to accomplish this action, two new CIP projects must be approved along with the appropriate fund transfers below.

FINANCIAL

The estimated construction cost for the two sewer replacement/rehabilitation projects is \$235,000. The total project cost including engineering, construction contingencies, material testing, construction staking and inspection is \$285,000. It is proposed that \$142,500 be transferred from the Reserve Future Capital Program account (PN:WB36) and \$142,500 from the Sewer Fund Contingency Reserve for the two projects.
