W. S. ...
 Owner or Owner's Representative.

1. The first step in the process of identifying a problem is to define the problem clearly and concisely.

2. The second step is to gather information about the problem and its causes.

3. The third step is to generate possible solutions to the problem.

4. The fourth step is to evaluate the possible solutions and choose the best one.

5. The fifth step is to implement the chosen solution and monitor its progress.

6. The sixth step is to evaluate the results of the solution and make adjustments as needed.

7. The seventh step is to document the process and results of the problem-solving effort.

8. The eighth step is to share the results of the problem-solving effort with others.
