City Council Sacramento, CA

Honorable Members in Session:

SUBJECT: Approval of Plans and Specifications for Construction of a

24" Diameter Water Transmission Main (Sacramento River Water

Treatment Plant to Richards Blvd.)

SUMMARY

The Division of Water and Sewers and the firm of Dewante & Stowell, Consulting Engineers, have prepared plans and specifications for the subject project. It is recommended that the plans and specifications be approved and the project be advertised for bid.

BACKGROUND

This project is part of the current 5-year Capital Improvements Program to extend filtered surface water across the American River to the Natomas Area of North Sacramento, and is the second phase of a two-phase project to move water from the Sacramento River Water Treatment Plant to West El Camino Avenue. Phase I is currently under construction (Richards Boulevard to West El Camino Avenue). These improvements will help perfect the City's surface water rights, reduce withdrawals from the underground supply, and are necessary to maintain adequate fire protection and water pressures during peak demand periods. Construction should be completed before May 1, 1982.

FINANCIAL

The final construction cost estimate for this project is \$170,000.00. The 1981/82 Capital Improvements Budget (4-13-3030-1524-4820) includes an unencumbered balance of \$135,500 for this project. Upon receipt and evaluation of actual bids and associated inspection costs, we will request a fund transfer to cover the project costs. There are sufficient monies available in the Water Fund to cover such anticipated costs.

APPROVED BY THE CITY COUNCIL

DEC 22 1981

OFFICE OF THE CITY CLERK

RECOMMENDATION

It is recommended that the plans and specifications for the subject project be approved and advertised for bid, and that bids be received on January 19, 1982.

Respectfully submitted,

R. W. Johnston Acting Manager
