City Council
Sacramento, California

OFFICE OF THE
CITY CLERK

Honorable Members In Session:

SUBJECT: Sacramento River Water Treatment Plant; High Lift Pump Discharge
Header Repairs (PN:ZC11) - Contract Award

SUMMARY

This project has been advertised for bids. A bid has been received and contract award is recommended.

BACKGROUND

This project provides for the installation of flexible piping connections in the high lift pump discharge headers at the Sacramento River Water Treatment Plant. Flexible connections are needed to relieve stresses in the piping which would otherwise occur due to differential settlement between the pump station caisson and the pipe chases which house the discharge headers.

The project is one of three planned construction projects which together will provide an increase in the reliable capacity of the Sacramento River Water Treatment Plant from 100 to 135 million gallons per day. The other two projects are (1), the "Sacramento River Water Treatment Plant Modifications - 1988" project which will also be funded from the ZC11 CIP budget, and (2), the "New Electrical Station" contract which will be funded under the ZC16 CIP budget. The Plant Modification project is currently out for bids and the Electrical Substation will be advertised for bids in the near future.

On June 8, 1988, the City Council approved the plans and specifications for this project. A single bids was received and opened by the City Clerk on June 28, 1988. The bid received was:

K.G. Walters Construction Co., Inc.

\$49,666

The engineer's estimated construction cost was \$50,000. The estimated project completion date is March 15, 1988.

City Council
Sacramento River Water Treatment Plant (PN:ZC11)
Contract Award
July 19, 1988
Page 2

Even though only a single bid was received, it is believed to be the best bid available at this time.

FINANCIAL

Sufficient funds are available for this project. The estimated total project cost, including all planning, design and construction costs, is \$58,500. The current budget for this project and the Sacramento River Water Treatment Plant Modifications project is \$4,000,000 from Water Funds, of which \$3,564,000 remains to fund this project and Modifications project, which is currently estimated to cost \$3,000,000.

RECOMMENDATION

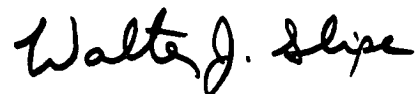

It is recommended that the City Council accept the bid of K.G. Walters Construction Co., Inc. in the amount of \$49,666, and award the contract.

Respectfully submitted,

THOMAS M. FINLEY
Engineering Division Manager
