MINUTES

Chair Serna summarized this report.

Joy Patterson, Associate Planner, stated that due to findings resulting from recent applications by churches and studies done by the Institute of Transportation Engineers, staff found that the current parking ratio for churches is not adequate. The ratio is currently one space for every six seats. Staff is suggesting the ratio be one space for every four seats. This standard would more closely comply with what other cities are doing according to a recent survey of 115 cities done by the International Parking Design, Inc. firm.

Chair Serna asked if this ratio would be applied to new structures only.

Ms. Patterson stated that it would apply to new structures and to special permits for remodeling or possibly expanding an already existing parking area.

Committee member Pane asked about a van pool provision.

Planning is encouraging van pool use with current church applications and is using the one to four ratio now, if possible.

Committee member Fargo asked why one space per four and why not one space for every three people since church occupancy may be less than 100%.

It was MOVED BY Committee member Fargo and SECONDED by Committee member Pane to approve staff recommendation.

The meeting was adjourned by Chair Serna at 1:27 p.m.
