

APPLICATION FOR PERMIT TO BUILD

Street No. 1322-30 Lot 21 Block 30 m
n.

Owner R J Moroney Address 1322-30

Architect _____ Address _____

Contractor A Mullen Address 1316-30

Kind of Building Frame City Bldg

Foundation _____

Permit 305
Date 6/13/5
District 1

	Girder		Span		Mud Sills	
	1st Floor	2nd Floor	3rd Floor	4th Floor	5th Floor	6th Floor
Joists						
Max. Span	<u>add Bath + extend Per Patch</u>					
Bearing Partitions						
Non Bearing Partitions						
Story Height			<u>2 1/2 stories</u>			
Outside Walls						

Ceiling Joists _____ Span _____

Roof _____ Rafters _____

Water Heater _____ Chimney _____

Size of Building—Length _____ Width _____ Height _____

It is hereby agreed that this building will be constructed in conformity with the Ordinances of the City of Sacramento and the Laws of the State of California.

ESTIMATED COST, \$ 2500

A. Mullen
Owner or Owner's Representative.

Plans must be submitted

The first part of the paper is devoted to the study of the asymptotic behavior of the solutions of the system (1) as $\epsilon \rightarrow 0$. In the second part, we study the asymptotic behavior of the solutions of the system (1) as $\epsilon \rightarrow 0$ and $\tau \rightarrow 0$. In the third part, we study the asymptotic behavior of the solutions of the system (1) as $\epsilon \rightarrow 0$ and $\tau \rightarrow 0$.

In the fourth part, we study the asymptotic behavior of the solutions of the system (1) as $\epsilon \rightarrow 0$ and $\tau \rightarrow 0$. In the fifth part, we study the asymptotic behavior of the solutions of the system (1) as $\epsilon \rightarrow 0$ and $\tau \rightarrow 0$.

In the sixth part, we study the asymptotic behavior of the solutions of the system (1) as $\epsilon \rightarrow 0$ and $\tau \rightarrow 0$. In the seventh part, we study the asymptotic behavior of the solutions of the system (1) as $\epsilon \rightarrow 0$ and $\tau \rightarrow 0$.

In the eighth part, we study the asymptotic behavior of the solutions of the system (1) as $\epsilon \rightarrow 0$ and $\tau \rightarrow 0$. In the ninth part, we study the asymptotic behavior of the solutions of the system (1) as $\epsilon \rightarrow 0$ and $\tau \rightarrow 0$.

In the tenth part, we study the asymptotic behavior of the solutions of the system (1) as $\epsilon \rightarrow 0$ and $\tau \rightarrow 0$. In the eleventh part, we study the asymptotic behavior of the solutions of the system (1) as $\epsilon \rightarrow 0$ and $\tau \rightarrow 0$.

In the twelfth part, we study the asymptotic behavior of the solutions of the system (1) as $\epsilon \rightarrow 0$ and $\tau \rightarrow 0$. In the thirteenth part, we study the asymptotic behavior of the solutions of the system (1) as $\epsilon \rightarrow 0$ and $\tau \rightarrow 0$.

In the fourteenth part, we study the asymptotic behavior of the solutions of the system (1) as $\epsilon \rightarrow 0$ and $\tau \rightarrow 0$. In the fifteenth part, we study the asymptotic behavior of the solutions of the system (1) as $\epsilon \rightarrow 0$ and $\tau \rightarrow 0$.

In the sixteenth part, we study the asymptotic behavior of the solutions of the system (1) as $\epsilon \rightarrow 0$ and $\tau \rightarrow 0$. In the seventeenth part, we study the asymptotic behavior of the solutions of the system (1) as $\epsilon \rightarrow 0$ and $\tau \rightarrow 0$.

In the eighteenth part, we study the asymptotic behavior of the solutions of the system (1) as $\epsilon \rightarrow 0$ and $\tau \rightarrow 0$. In the nineteenth part, we study the asymptotic behavior of the solutions of the system (1) as $\epsilon \rightarrow 0$ and $\tau \rightarrow 0$.

In the twentieth part, we study the asymptotic behavior of the solutions of the system (1) as $\epsilon \rightarrow 0$ and $\tau \rightarrow 0$.
