

3548 - 40th St
Owner Mr. E. C. Bingle Permit No. 5641

Location Lot. 5208 H. J. Goethe Addn Q.

Kind of Structure Wood' New House 1 story frame dwelling 5 room.

Builder H. Buck

Architect _____

Permit Issued 3/11/14 Permit Expires 6/15/14 Estimated Cost \$ 1500-

Application No. 5651 Date of Application 3/11/14 Fee \$ 2.00

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that proper record-keeping is essential for transparency and accountability, particularly in the context of public administration and financial management. The text notes that without reliable records, it is difficult to track the flow of funds and ensure that resources are being used effectively and efficiently.

2. The second part of the document addresses the challenges associated with data collection and analysis. It highlights that gathering accurate and timely data can be a complex task, often requiring the coordination of multiple departments and the use of various data sources. The text also discusses the importance of ensuring the quality and integrity of the data collected, as well as the need for robust data management systems to store and analyze the information.

3. The third part of the document focuses on the role of technology in improving data management and analysis. It discusses how modern data management tools and software can help organizations streamline their data collection processes, reduce errors, and gain valuable insights from their data. The text also touches on the importance of ensuring that these technologies are secure and that data is protected from unauthorized access.

4. The fourth part of the document discusses the importance of data privacy and security. It emphasizes that organizations have a responsibility to protect the personal information of their users and customers, and that this requires implementing strong security measures and privacy policies. The text also discusses the legal requirements surrounding data privacy and the potential consequences of non-compliance.

5. The fifth part of the document discusses the importance of data-driven decision-making. It argues that organizations should use the insights gained from their data to inform their strategic decisions and improve their overall performance. The text also discusses the importance of fostering a data-driven culture within the organization, where data is used to guide decision-making at all levels.

6. The sixth part of the document discusses the importance of data literacy and training. It argues that employees should be equipped with the skills and knowledge needed to effectively use data in their work. This includes understanding how to collect, analyze, and interpret data, as well as the ability to communicate data insights to others. The text also discusses the importance of ongoing training and development to keep employees up-to-date on the latest data management and analysis techniques.

7. The seventh part of the document discusses the importance of data governance. It argues that organizations should have clear policies and procedures in place to govern the use of data, ensuring that it is collected, stored, and shared in a responsible and ethical manner. The text also discusses the importance of having a designated data governance team or role to oversee the organization's data management practices.

8. The eighth part of the document discusses the importance of data transparency and accountability. It argues that organizations should be open about how they collect, use, and share data, and that they should be held accountable for any misuse of data. The text also discusses the importance of having clear data retention and deletion policies in place to ensure that data is not kept longer than necessary.

9. The ninth part of the document discusses the importance of data security and risk management. It argues that organizations should have a comprehensive data security strategy in place to protect their data from various threats, including cyberattacks, data breaches, and hardware failures. The text also discusses the importance of having a data backup and recovery plan in place to ensure that data can be restored in the event of a disaster.

10. The tenth part of the document discusses the importance of data ethics and social responsibility. It argues that organizations should consider the ethical implications of their data management practices, particularly in the context of privacy, bias, and discrimination. The text also discusses the importance of being transparent about the organization's data practices and the potential impact of its data on society.
