

### CITY OF SACRAMENTO

#### DEPARTMENT OF FINANCE

**BUDGET DIVISION** 

May 31, 1985 FA:85241:BM:KMF

Budget and Finance Committee Sacramento, California

Honorable Members in Session:

SUBJECT: Recommended Increases to the Proposed Budget

#### SUMMARY

At the May 28th Budget Hearing additional General Fund resources were identified. This report responds to the Committee's request for alternative uses of these funds.

#### BACKGROUND

On May 28th, staff identified \$1,480,000 in additional General Fund resources resulting from a lower than expected CPI. The Committee also identified the remaining Certificate of Participation (COP) reserve of \$458,000 as a potential resource to be used to augment the budget. Staff was then requested to prepare a report identifying alternative uses for these funds. In preparing a priority list of unmet needs, staff took into account both Council and department priorities.

First, staff proposes that the remaining COP reserve (\$458,000) be added to the budgeted Administrative Contingency. This would bring the General Fund contingency to \$867,000. Based on historical spending patterns this would be a minimal amount for accommodating midyear adjustments. As a comparison, \$2.5 million has been spent to date from Contingency, \$1.7 million was spent in 1983-84 and \$3.0 million 1982-83.

Second, it is recommended that the \$1,480,000 be allocated as shown on Table 1. The bulk of the funds (\$1,137,000) would be used to fund 21 Public Safety positions as well as a CIP project and a new radio channel for Fire. The 17 additional officers would bring total proposed new Police Officers to 25.25 FTE. The additional Dispatchers would bring the total added since March to 13 FTE. The Geo-Coding position would be located in the Data Processing Department, but would coordinate for the City all geocoding information relating to Police. Fire, Streets, etc. The remaining funds would be used to augment the Street Maintenance Program, Animal Control, the Library and the Energy Conservation Program. In addition an Economic Development Coordinator position is proposed for Planning and Development.

The above list addresses some very important areas for the City but falls short of filling all unmet needs. Table 2 provides a listing of other significant areas of unmet needs which the Proposed Budget does not address. The list is divided between the CIP and the Operating Budgets with detail listed alphabetically by department. Within each department items are listed in priority order.

#### RECOMMENDATION

#### Staff recommends that:

- 1. The remaining COP reserve of \$458,000 be allocated to the Administrative Contingency.
- 2. The \$1,480,000 in employee service savings be used to fund the items listed in Table 1.

Respectfully submitted,

BETTY MASUOKA

Budget Officer

RECOMMENDATION APPROVED:

SOLON WISHAM, JR.

Assistant City Manager
