ESTIMATED COST, \$ 100

Plans must be submitted

F. O. Huber
Owner or Owner's Representative.

one partner's abuse, and we believe that this is an important area for future research. In addition, our findings suggest that the power imbalance in the relationship may be a factor in the decision to remain in an abusive relationship. This is particularly true for women who are economically dependent on their partners. Future research should explore the role of economic dependence in the decision to remain in an abusive relationship.

Our findings also suggest that the decision to remain in an abusive relationship is not a simple one. It is a complex process that involves weighing the risks and benefits of staying versus leaving. We believe that this is an important area for future research, as it can help us to better understand the decision-making process of women who remain in abusive relationships.

In addition, we believe that it is important to explore the role of social support in the decision to remain in an abusive relationship. Women who have strong social support networks are more likely to leave an abusive relationship. Future research should explore the role of social support in the decision to remain in an abusive relationship.

Finally, we believe that it is important to explore the role of mental health in the decision to remain in an abusive relationship. Women who have mental health issues are more likely to remain in an abusive relationship. Future research should explore the role of mental health in the decision to remain in an abusive relationship.
