Honorable Members in Session:

SUBJECT: Resolution Approving Negative Declaration for TRAFFIC SIGNAL AND STREET LIGHTING SYSTEM AT THE INTERSECTION OF 24TH STREET AND 68TH AVENUE/ GARDENDALE ROAD

SUMMARY

The Environmental Coordinator has reviewed the subject project and finds that it will not have a significant adverse effect on the physical environment and therefore recommends that the project and a Negative Declaration be approved by the City Council.

BACKGROUND

In accordance with State EIR Guidelines for Implementation of the California Environmental Quality Act of 1970, dated December 1976, an Initial Study was performed. As a result of this study, it was determined that the TRAFFIC SIGNAL AND STREET LIGHTING SYSTEM AT THE INTERSECTION OF 24TH STREET AND 68TH AVENUE/GARDENDALE ROAD would not have a significant adverse effect on the physical environment and a draft Negative Declaration was prepared. On January 22, 1980, the Negative Declaration was filed with the County Clerk. On January 24, Notice of Opportunity for Public Review of the draft Negative Declaration was published in The Sacramento Union. The appropriate length of time has elapsed for receipt of comments regarding the Negative Declaration, with no comments having been received.

RECOMMENDATION

The Environmental Coordinator recommends that the attached resolution be passed which will:

1. Determine that the proposed project will not have a significant effect on the environment.
2. Approve the Negative Declaration.
3. Approve the project.
4. Authorize the Environmental Coordinator to file a Notice of Determination with the County Clerk.

21. <u>Mandatory Findings of Significance</u> .			
a. Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?	—	—	<u>x</u>
b. Does the project have the potential to achieve short-term, to the disadvantage of long-term, environmental goals? (A short-term impact on the environment is one which occurs in a relatively brief, definitive period of time while long-term impacts will endure well into the future.)	—	—	<u>x</u>
c. Does the project have impacts which are individually limited, but cumulatively considerable? (A project may impact on two or more separate resources where the impact on each resource is relatively small, but where the effect of the total of those impacts on the environment is significant.)	—	—	<u>x</u>
d. Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	—	—	<u>x</u>

7. Light and Glare - The installation of street lights as part of the proposed project will provide new lighting at the intersection. The new intersection lighting will give much better visibility during the hours of darkness for vehicular and pedestrian traffic. Glare will be minimized by the use of 30 foot high standards.

14e. Maintenance of Public Facility - The proposed project would require periodic maintenance. The City has a traffic signal maintenance group for this type of work and the addition of this intersection would cause no substantial increase in the work load.

IV. Mitigation measures proposed to minimize environmental impacts for the project as identified above. (Explain in detail - if none, so state)

There are no mitigating measures.

V. Alternatives to the project which would produce less of an adverse impact on the environment (lower density, less intense land use, move building on site, no project, et cetera)

The alternative to the project would be no project. This would leave the intersection in the existing state, where 68th Avenue/Gardendale Road has no protected pedestrian or vehicular movements.

VI. DETERMINATION

On the basis of this initial study:

- I find the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.
- I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because the mitigation measures described in IV above have been added to the project or the possibility of a significant effect on the environment is so remote as to be insignificant.
- I find the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT IS REQUIRED.
