Honorable Members In Session:

Subject: Folsom Boulevard at Jackson Road Water Main Project (JN:9929) - Project  
Approval and Fund Transfer

SUMMARY

Plans and specifications have been prepared for the subject project. Project approval and fund transfer is recommended.

BACKGROUND

The area bounded by Folsom Boulevard on the north, Jackson Highway on the south and Florin-Perkins Road on the east is currently provided water via an eight inch water line feed from a water transmission main that runs parallel to Folsom Boulevard. If the water transmission main had to be put out of service for an extended period of time, water users in this area would be without water. Therefore, it has been deemed necessary to provide an additional tie to the City's water system. This project will provide the required connection.

FINANCIAL

This project is not currently funded. The estimated total project cost, including all planning, design, construction and construction administration is \$70,000. The 1987-88 Water CIP Program included \$100,000 for Miscellaneous Water Main Improvements; currently \$75,000 remains in this project fund. It is proposed that \$70,000 be transferred from the Miscellaneous Water Main fund for this project.
