SUBJECT: Replacement of the Combination Sewer Line in the K-L Alley from 19th to 20th Streets (PN:XB66) - Cooperative Agreement

SUMMARY

A cooperative agreement between US Sprint Communications Company and the City of Sacramento to have US Sprint construct a steel casing pipe near their facilities in the K-L Alley, in conjunction with subject project, has been reached. Approval of the cooperative agreement is recommended.

BACKGROUND

This project entails replacement of an existing combination sewer line in the alley between K and L Streets from 19th to 20th Streets. It is necessary to replace this section of combination sewer line due to its generally deteriorated condition and crushing under the Union Pacific railroad tracks.

In researching the locations of the existing utilities in the project area, it was discovered that an existing US Sprint fiber optic line rests directly on the City's existing combination sewer line. The City requested US Sprint to relocate their facilities prior to construction of the replacement sewer line to avoid damage to them during construction. After reviewing the request, US Sprint indicated that they would be interested in constructing the steel casing pipe adjacent to their facilities themselves and assume all risk for protecting their facilities during its construction rather than relocate their facilities. Upon completion of construction of the steel casing pipe by US Sprint and acceptance of the steel casing pipe by the City, it shall become property of the City and the City's contractor will then install the replacement combination sewer line in the steel casing piping.

FINANCIAL

The estimated cost for the work covered by this agreement is \$7,000. All work related to the installation of the steel casing pipe will be performed by US Sprint Communications Company by separate contract at no cost to the City. No adjustments to any funds is necessary.

RECOMMENDATION

It is recommended that City Council approve the cooperative agreement by adoption of the attached resolution.

Respectfully submitted,

THOMAS M. FINLEY
Engineering Division Manager
