The North Sacramento Community Plan designates the site Residential 4-8 du/na and the General Plan designates the site Residential (4- 15 du/na). There are two existing residential units on the site. The applicant proposes to relocate the existing common interior property line in order to provide room to expand the existing dwelling on the northern lot (lot 06) and to equalize the square footage between the two lots.

The two lots would meet minimum lot width, depth and area requirements. The proposed lot line adjustment was reviewed by the Department of Public Works Engineering Development Division, Transportation Engineering

Division, the Building Division, and the Planning Division. There were no objections to the proposed project. The following comments were received:

Engineering Development

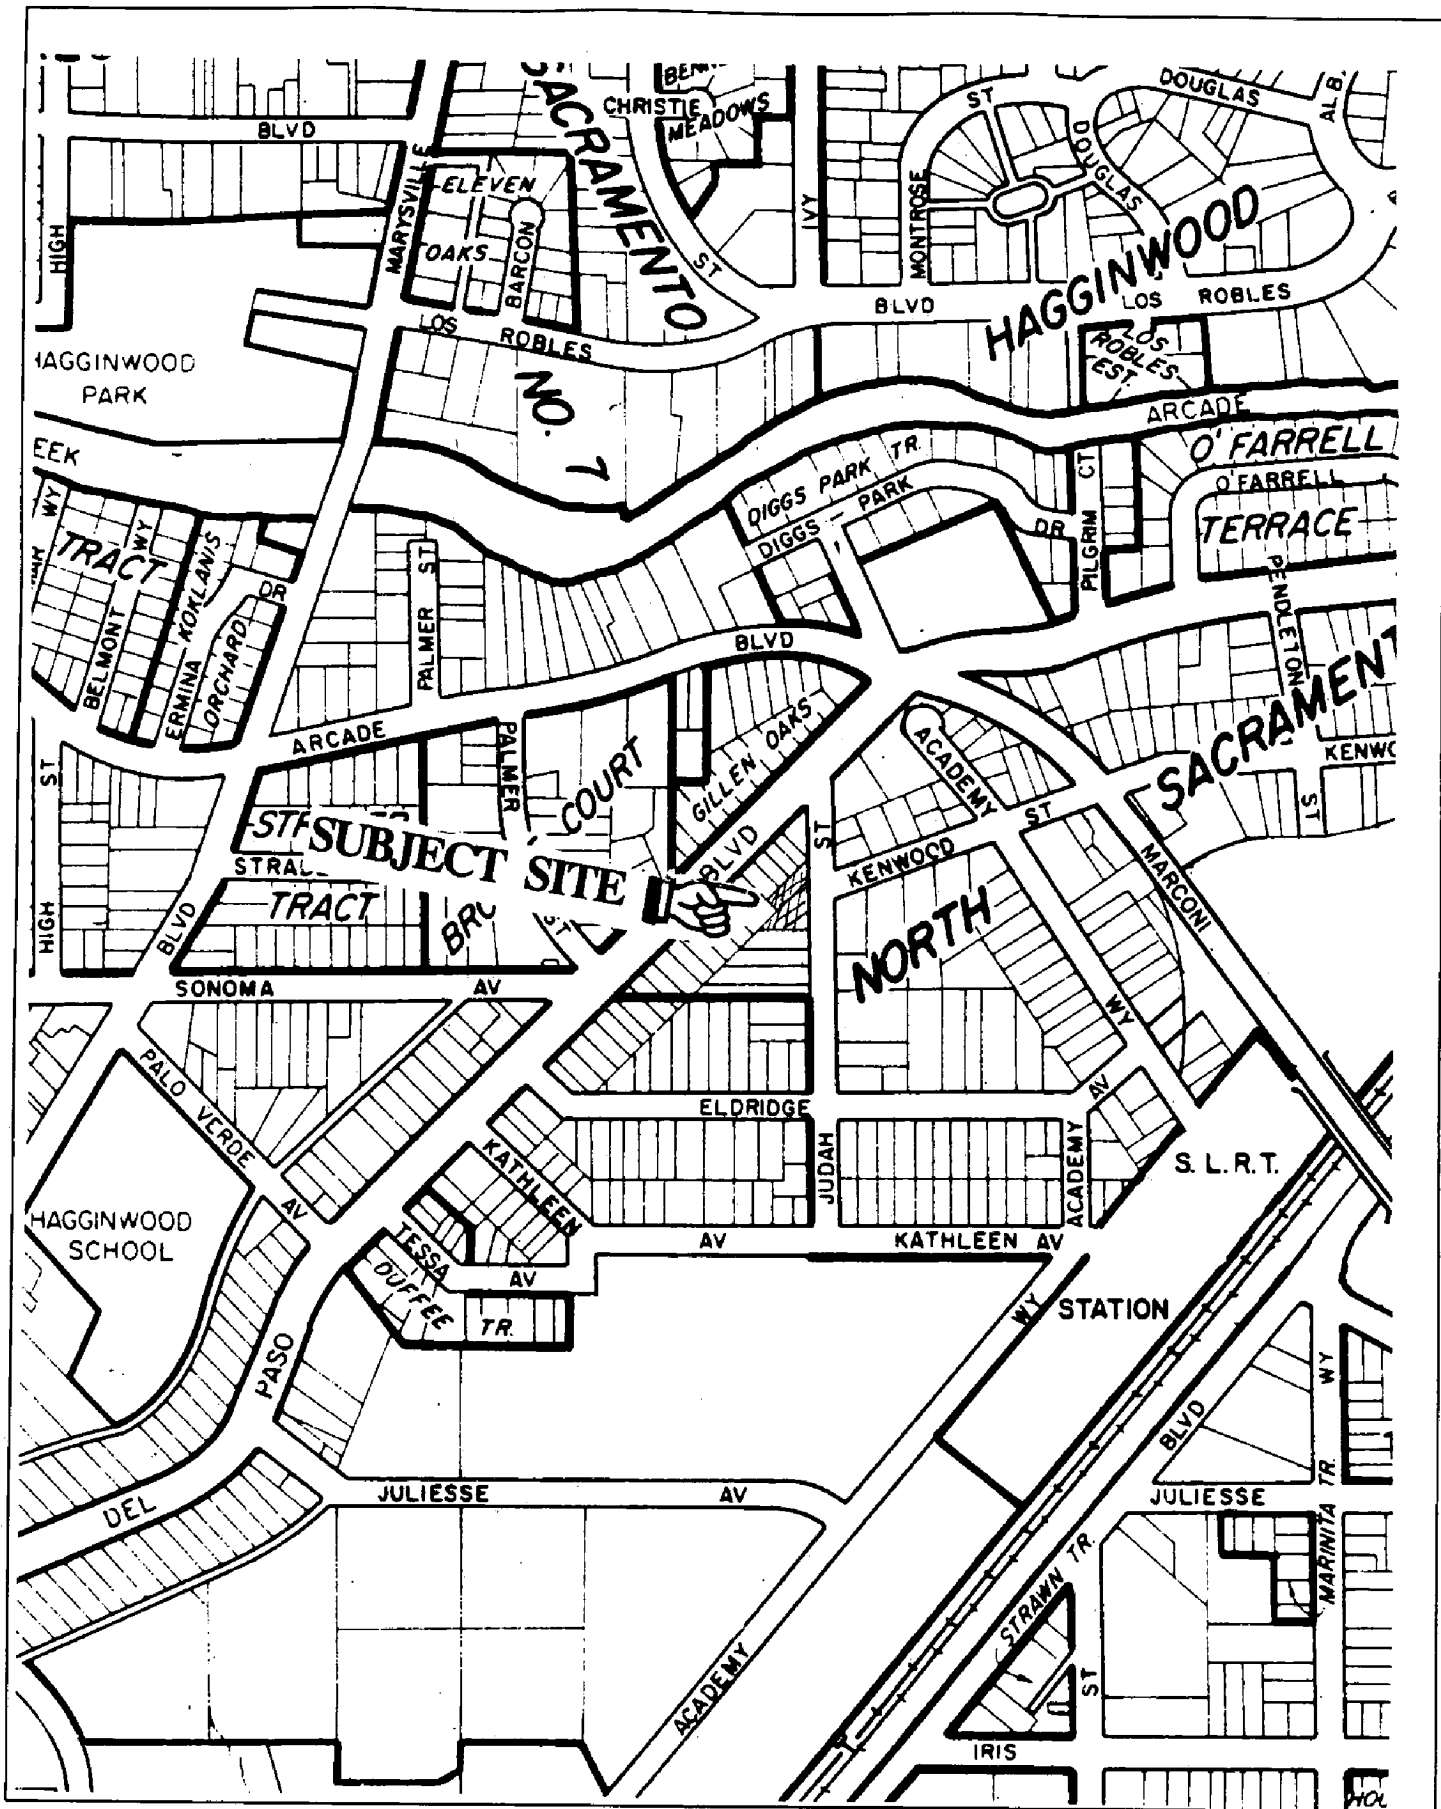

- A. File a Certificate of Compliance, submit all required documents according to the submitted requirements checklist, and pay necessary fees.
- B. File a waiver of Parcel Map.
- C. Submit drawing showing location of existing sewer and water services.
- D. Provide separate water and sewer services for each unit to the satisfaction of the Utilities Department.
- E. Existing garage and shed shall meet building code requirements where location is within the setback area of the proposed lot line.

ENVIRONMENTAL DETERMINATION

This project is exempt from environmental review pursuant to State EIR Guidelines, CEQA Section 15305.

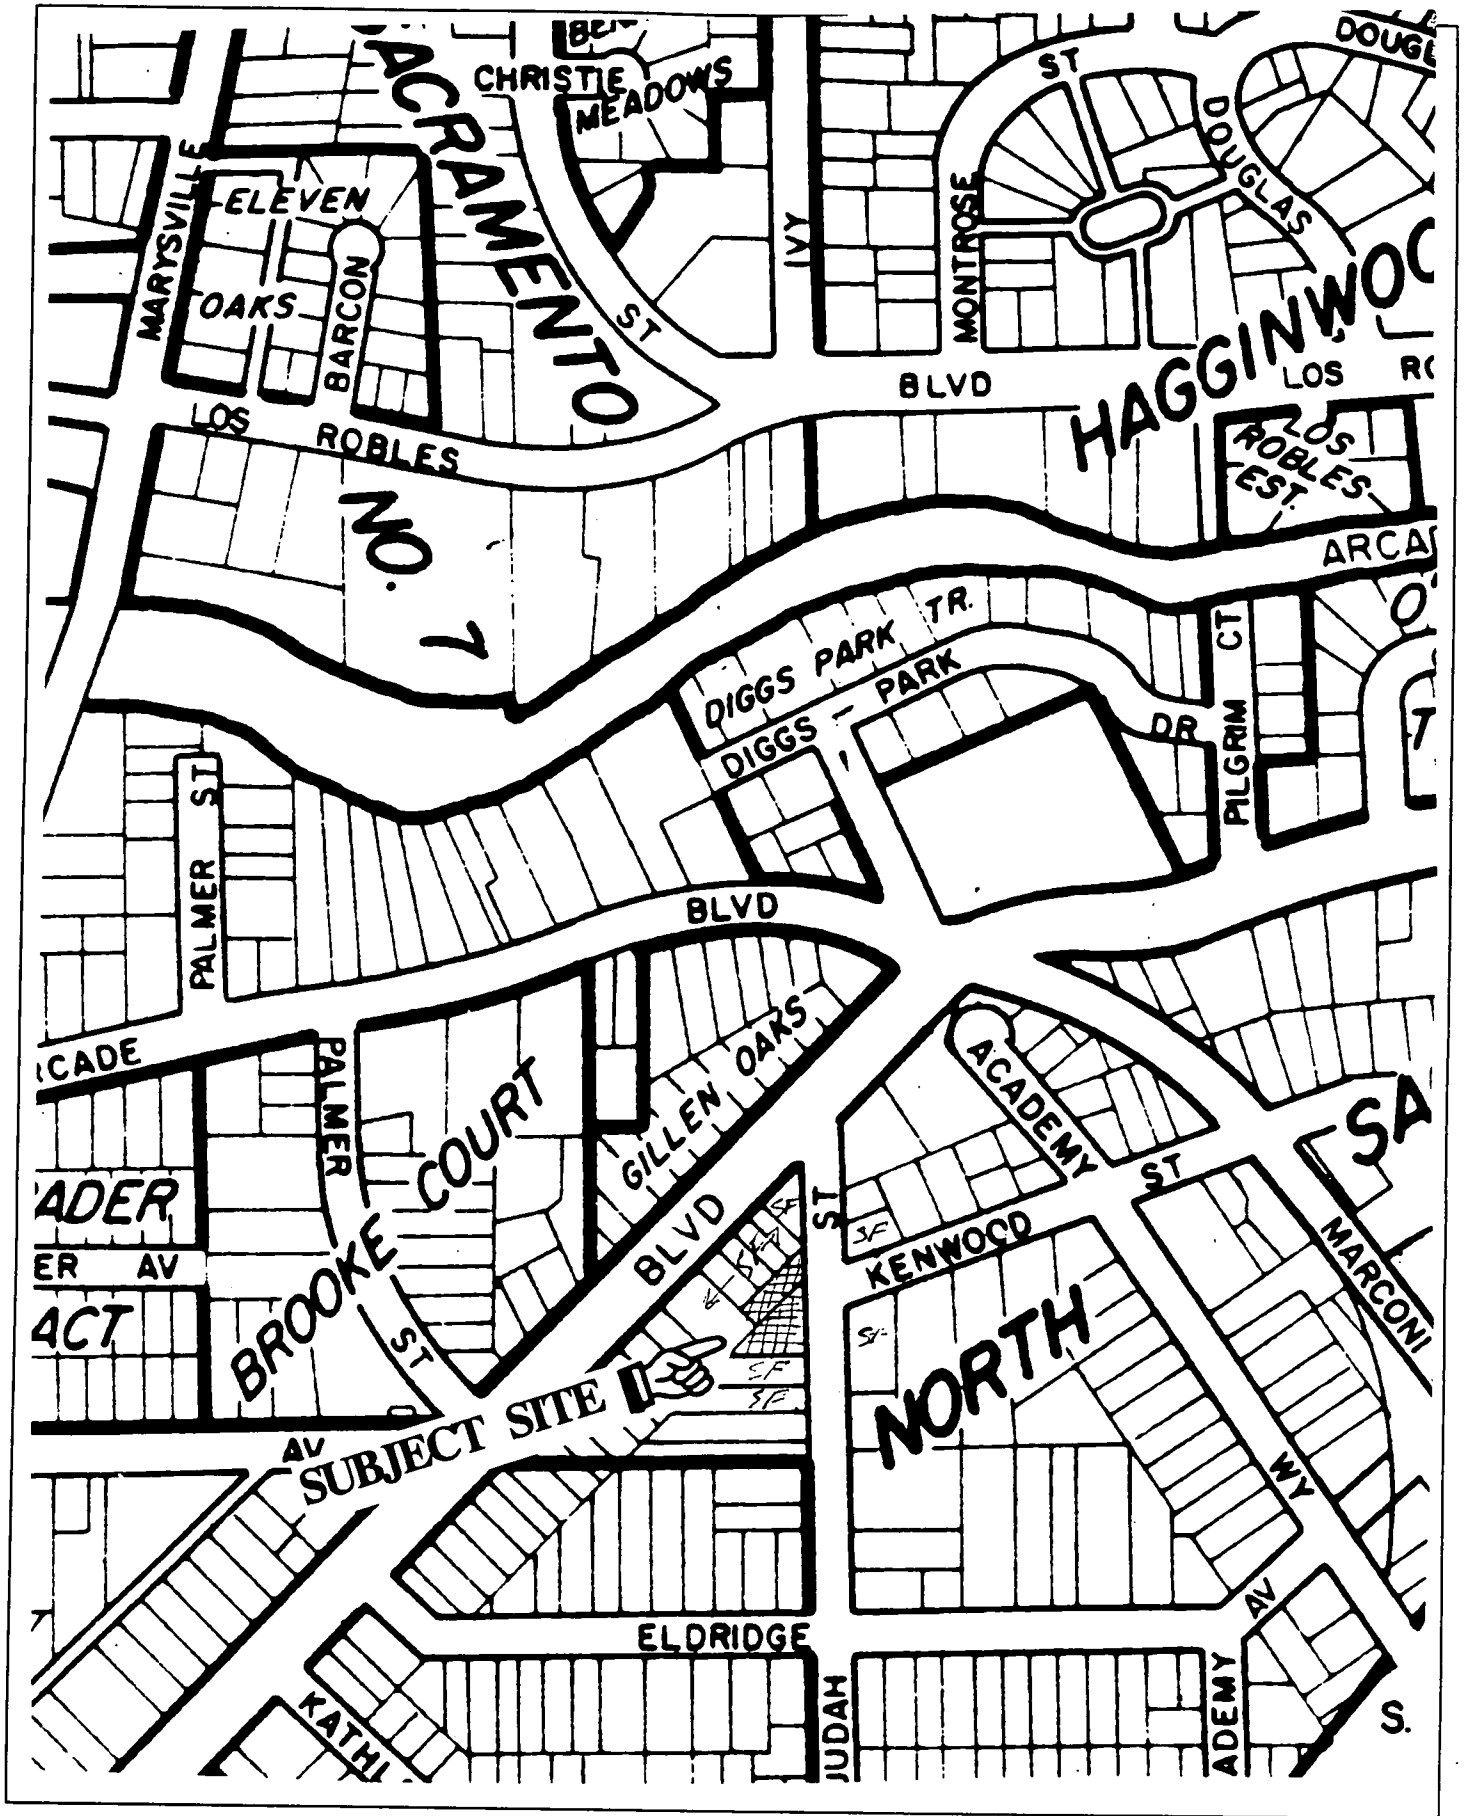

RECOMMENDATION: Staff recommends the Planning Commission approve the lot line adjustment by adopting the attached resolution.
