RE: Shear wall repair at front of house for exposed rebar at continuous footing - Lot 109 (Plan 3C) - Heritage (#20028)

To whom it may concern:

This letter is to verify that for the above plan the section of exposed rebar at the front of the house footing (top bar) may be removed and the concrete patched. However as a result of this change, the shear wall sub diaphragm in this area must have sheathing added to the inside face of the wall. The same shear specification and nailing as originally shown on the plans will be used for the inside face. Please note that all holdown posts in this area shall be edge nailed full height.

If you have any questions, please contact Paulo Ibañez.
