RE: Solid Waste Transfer Station Consultant Selection

SUMMARY

The Department of Public Works has conducted a consultant selection process to identify the best consultant to proceed with transfer station siting, environmental review and design. This report recommends that the City Manager be authorized to negotiate and execute a contract for professional services with Black and Veatch.

BACKGROUND

In late 1985 the Sacramento City Council approved the concept that wastes collected by the City of Sacramento be handled through a transfer station for haul to a remote landfill. This option would provide an interim disposal solution after the City's 28th and A Street Landfill closes in 1990.

During the discussions at the February 3, 1987 Joint Transportation and Community Development/Budget and Finance Committee, the Committee endorsed the construction of a City owned transfer station and the preparation of an environmental assessment for the construction of such facility. At the February 17, 1987 meeting of the City Council, staff was directed to proceed with environmental assessment and site analysis for construction of a Solid Waste Transfer Station, considering among other things:

- a. A Site evaluation of all reasonable government and privately owned sites within the City;
- b. A site in the vicinity of the Richards Blvd. industrial area;
- c. Eliminate from any consideration the City owned property at 28th and A Streets.

Page 2

The Department of Public Works has pursued a consultant selection process to identify a consultant that could continue the transfer station project work. A consultant selection committee was organized to screen the candidates. The committee consisted of :

- Reginald Young, Deputy Director of Public Works
- John Boss, Solid Waste Division Manager
- Ken Nishimoto, Budget Officer
- Tokua Masuda, Principal Planner
- Dennis Kerton, Chief of County Public Works, Solid Waste Division

The consultant selection committee reviewed the Statements of Qualifications and identified three (3) firms as the most qualified. A request for Proposal (RFP) was sent to each of these three (3) firms. Proposals were received on September 24, 1987, and formal interviews were conducted on October 1, 1987. The selection committee reviewed the proposals in detail and conducted the interviews.

Based on the work of the selection committee, the Department is prepared to recommend Black and Veatch to do the work. If contract negotiations with Black and Veatch are not successful, Brown and Caldwell would be the next choice. The scope of work to be negotiated includes the following basic elements:

- Public participation program.
- Preliminary site evaluation.
- Environmental Review (EIR).
- Permit procurement.
- Design.
- Designer services during construction.

The proposed contract shall be negotiated such that the consultant services are phased as Pre-Design and Design activities. The Pre-Design activities will include conducting complete environmental and economic reviews on three sites and a no project, direct haul, alternative. The Pre-Design services shall cost approximately \$150,000 and could result in a no design decision. A decision to design a Transfer Station would require an expenditure of an additional \$450,000 for Design Services.

FINANCIAL DATA

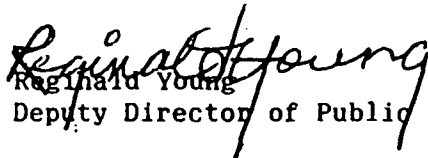

The City's Capital Improvement Program includes funds for the transfer station project. The Department of Public Works estimates that up to \$600,000 will be required for the consulting services.

SUBJECT: AGREEMENTS TO OBTAIN PROPOSALS FOR ALTERNATIVES TO THE DIRECT HAUL OF SOLID WASTE TO THE COUNTY LANDFILL AND TO STUDY THE ENVIRONMENTAL IMPACTS OF HAULING CITY SOLID WASTE TO THE COUNTY LANDFILL

SUMMARY

This report recommends that the Joint Committees approve the attached resolution. This resolution authorizes the City Manager to take those actions required to select a consultant to obtain viable alternatives to the direct haul of Sacramento Municipal Solid Waste (MSW). This report also transmits two proposed agreements to the Joint Committees for review. Transmitted for your information, as Exhibit 1, is a proposed agreement with Black and Veatch Consulting Engineers to prepare an Environmental Impact Report (EIR) for the direct haul of our MSW. The City Council previously authorized the City Manager to negotiate and execute this agreement. Also transmitted herewith, as Exhibit 2, is a proposed agreement with the firm of Brown, Vence and Associates to identify and recommend, for environmental analysis, viable alternatives to the direct haul of MSW to the County Landfill.

BACKGROUND

On November 17, 1987, the City Council adopted Resolution 87-949, which authorized the City Manager to negotiate and execute an agreement with Black and Veatch for professional services. These services were related to the evaluation of alternatives for solid waste direct haul versus solid waste transfer. On March 29, 1988, the City Council approved a staff recommendation that amended Resolution 87-949 such that the City Manager was to negotiate and execute an agreement to commission an EIR on direct haul of MSW and not to do a study on transfer.

Subsequent to the March 29, 1988, approval, the City Council and staff have been apprised of several alternatives to the direct haul project. Thus, City staff recommends herein that the City retain the services of a consultant to solicit, and thereafter evaluate, responses to a Request-for-Qualifications (RFQ) from all proponents of direct haul alternatives. The consultant would evaluate the various alternatives for their fiscal and technical soundness and viability. Certain alternatives determined to be viable will be included and analyzed in the EIR done for the direct haul proposal. Because of the significant environmental impacts likely to be associated with any alternative proposal, it is anticipated that an extensive environmental assessment will be required before any alternative(s) to the direct haul proposal may be selected. All alternatives selected, for consideration, will be discussed and analyzed to some extent in the direct haul EIR; however, the alternative analysis will be limited in scope and, by itself, will not allow for the selection of an alternative. To the extent that the proponent of an alternative is willing to pay for the additional costs of a more extensive environmental analysis, the City will include such further analysis as part of the direct haul EIR.

Solicitation of alternative proposals pursuant to the RFQ, and the EIR analysis, will be conducted concomitantly, and the relationship between these procedures shall be as shown on Figure 1.

The Department of Public Works has identified a consultant that could solicit and evaluate alternatives to direct haul. After review of the qualifications of three firms, the Public Works Department recommends that the City Manager be authorized to negotiate an agreement with Brown, Vence and Associates to provide the services necessary to identify viable alternatives to direct haul.

FINANCIAL DATA

The City approved the 1988 to 1993 Capital Improvement Program, which includes funds for this work in CIP YA 06. The Council has previously approved the execution of a direct haul EIR Agreement in an amount not to exceed \$100,000. The Department of Public Works estimates that solicitation of qualified alternatives to direct haul can be accomplished for an amount not to exceed \$100,000.

POLICY CONSIDERATION

This proposal would result in the City initiating an RFQ process to seek viable alternatives to the proposed direct haul of City solid waste to the County Landfill. The RFQ process should result in additional alternatives being studied in the City's EIR of direct haul. To the extent an alternative proponent wishes a more complete environmental analysis than that of a standard alternative, the proponent will bear that cost.

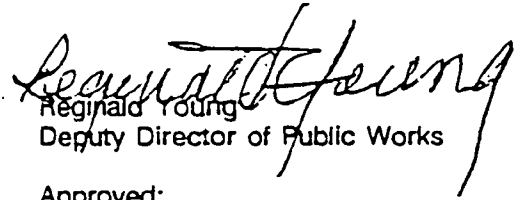

MBE/WBE

Neither consulting firm has been identified as an MBE/WBE. During the performance of the attached agreements, each consultant agrees to the Equal Opportunity Provisions of the City of Sacramento's Consultant and Professional Services Agreement.

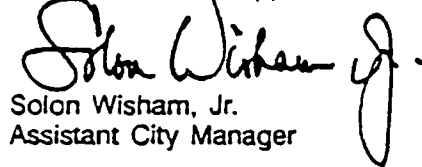

RECOMMENDATION

It is recommended that the Joint Committees approve the attached resolution. The resolution authorizes the City Manager to negotiate and execute an agreement, up to \$100,000, with Brown, Vence and Associates for professional services. These services are related to identifying and recommending, for environmental analysis, viable alternatives to direct haul of MSW to the Sacramento County Landfill. This report will then be forwarded to the full City Council for final adoption of the resolution.

2. Services to be provided are specified below:

Subject to the terms and conditions set forth herein, Consultant shall accomplish all work necessary to prepare an Environmental Impact Report (EIR) for the Direct Haul of Sacramento City Municipal Solid Waste to the Sacramento County Landfill. The EIR shall be prepared in accordance with the requirements of the California Environmental Quality Act (CEQA), the guidelines for implementation of CEQA, and the local regulations of the City of Sacramento. The work shall include, but not be limited to, the following:

TASK 1 – SCOPING/NOTICE OF PREPARATION

1.1 – Scoping

The Consultant shall, immediately after award of contract and Notice to Proceed, prepare a Notice of Preparation (NOP) for distribution and shall schedule two scoping sessions, one in the day and one in the evening, for representatives of responsible agencies and the public, respectively. The Consultant shall participate in the scoping sessions and shall prepare a brief summary report of the sessions for City staff review and Draft EIR Appendix inclusion.

Prior to preparation of the NOP, an initial conference shall be held between City staff and key Consultant personnel. The purpose of this conference will be to identify existing base data and resources helpful to the Consultant in the preparation of the Draft EIR. This conference will also serve to further establish specific City concerns and anticipated Consultant focus during the preparation of the EIR and to delineate special areas of desired emphasis in analysis and report generation. The NOP shall include references to a Request-for-Qualifications (RFQ) that shall seek alternatives to the project.

The NOP shall circulate for 30 days. At the conclusion of the circulation, the Scope of Work for Task 2 shall be finalized.

TASK 2 – DRAFT EIR

2.1 – Data Collection

The Consultant shall assemble, through a combination of site, route and vicinity inspection, records search, field work, interviews, and document review, and input from Brown, Vence and Associates (BVA), the necessary base data required to describe and analyze the environmental setting of the project as necessary to identify potential adverse impacts. During the course of this task, liaison shall be maintained with City staff for the purpose of verifying data legitimacy and enabling interpretations of significance of data where appropriate.

2.2 – Analysis of Environmental Setting and Potential Project Impacts

The Consultant shall review all previously assembled environmental documents and base data to determine the possible affects of the project on the local and regional setting. Alternative mitigation measures; for identified adverse environmental impacts, shall be formulated, considered, and recommended on the basis of effectiveness and implementability. Emphasis shall be placed upon the selection and comparative environmental evaluation of project alternatives.

The alternatives to the project to be evaluated shall include:

1. No Project
2. Recycling/Transfer
3. Processing into Refuse Derived Fuel (RDF)/Materials Recovery Facility (MRF)
4. Composting
5. Landfilling Vegetal Waste at a Class III Site

Additional alternatives within the project may be identified by the RFQ-TI procedure. If identified, these alternatives will also be included in the EIR.

2.3 – Preparation of Draft EIR Document

Based on completion of the foregoing tasks, the Consultant shall prepare a draft of the EIR document. Six copies of this administrative draft document shall be provided to the City staff for review and comment. Based on staff comments, the document shall be revised and prepared for general distribution in accordance with City and State CEQA guidelines. The Consultant shall assist the City in development of an appropriate distribution list for the Draft EIR. The Consultant shall assume responsibility for printing 100 copies of the Draft EIR for distribution. Postage and actual document distribution shall be the responsibility of the City. A Notice of Completion shall be filed by the City with the State when the Draft EIR is circulated; the Notice shall be prepared by the Consultant.

TASK 3.0 – FINAL EIR

3.1 – Preparation of Final EIR Document

The Consultant shall review and prepare responses to all comments received from individuals, agencies, and organizations reviewing the Draft EIR. Additional research and analysis shall be conducted by the Consultant as necessary. The comments and Consultant's responses shall be combined with a listing of all persons, organizations, and agencies commenting on the Draft EIR, and any other pertinent materials, and published as an appendix to the Draft EIR. This appendix, and the Draft EIR, shall then constitute the final EIR for the project. The Consultant shall prepare, and forward to the City for review, six copies of an Administrative Review Final EIR.

3.2 – Mitigation Monitoring

The Consultant shall develop a mitigation reporting and monitoring program for all mitigation measures recommended for the project.

3.3 – Public Meetings/Hearings

The Consultant shall attend all public meetings, workshops, or hearings necessary to the environmental processing of this project by the City Planning Commission, Transportation and Community Development Committee, and the City Council. The Consultant shall be prepared to make presentations and/or respond to City officials and public questions as deemed appropriate by the City staff. It is anticipated that there will be no more than five public meetings, workshops or hearings. If staff requires the Consultant to attend more than five such meetings, the cost of such attendance shall be separately negotiated.

Additionally, the Consultant proposes to meet monthly with the City staff, during EIR preparation and processing, to provide progress reporting, review data, and analysis, and secure City staff input as required to assure that the completed EIR fully meets the City's needs.
