City Council
Sacramento, California

Honorable Members In Session:

SUBJECT: Bowles Street Drainage (PN:WB31) - Project Approval and Bid
Advertisement

SUMMARY

Plans and specifications for this project have been prepared. Approval of the plans and specifications and authorization to advertise for bids is recommended.

BACKGROUND

The intersection of Bowles Street and Oakmont Street is the lowest spot in the immediate area and is subject to periodic flooding. This project will replace existing culverts extending under Altos Avenue and the Sacramento Northern Bikeway with twin 36 inch underground pipes. The existing drain pipes in Traction Avenue and Bowles Street will be replaced with larger diameter pipes at a greater depth. These items will provide drainage relief to the intersection of Bowles Street and Oakmont Street.

A Negative Declaration for this project was filed with the County Clerk of the County of Sacramento on April 4, 1984. The engineer's estimated construction cost is \$108,000.

FINANCIAL

Sufficient funds are available for this project. The estimated total project cost, including all planning, design and construction costs, is \$125,000. The current budget is \$132,000, which was approved in the Capital Improvement Program from Storm Drainage Funds.

RECOMMENDATION

It is recommended that the City Council approve the plans and specifications for this project and authorize the City Clerk to advertise for bids to be received on March 24, 1987.

Respectfully submitted,

THOMAS M. FINLEY
Engineering Division Manager

ADDENDUM NO. 1

March 17, 1987

BOWLES STREET DRAINAGE
PN:WB31

Bids to be received March 24, 1987

This Addendum is applicable to work designated herein and shall be a part of and be included in the Contract, and the Contractor shall acknowledge his acceptance of this Addendum by noting on the Sealed Proposal for, and submitting the required information with, the bid.

NOTE:

Sheets 2 and 3 of the Plans have been revised to show the location of existing gas mains (2 inch diameter) and service as well as water mains (6 inch diameter) on services.

All bidders shall take the location of their utilities into consideration in the preparation of their bids.
