In response to the City of Sacramento's Beautification of Franklin Boulevard Project, the Sacramento Municipal Utility District proposes to install underground electric facilities along Franklin Boulevard and remove the existing overhead pole lines. District facilities are to be installed in accordance with its rules and regulations which require that a formal right of way be granted by the property owners where needed.

Standard District procedure is to obtain the right of way prior to installation of facilities. Therefore, please review the enclosed Grant of Right of Way document covering the proposed location of underground facilities on your property at 5305 Franklin Boulevard, Sacramento County. The route of the right of way is described in the document and shown in red on the sketch.

Please have the signatures notarized, or call Mike Kirby at (916) 732-5331 for witnessing, after it has been signed by all necessary parties and return it to this office in the enclosed envelope. In order to avoid difficulty when we submit the document to the County of Sacramento for recording, it is important that you return the original. The copy of the document and drawing are for your files.
