Honorable Members In Session:

**SUBJECT:** Base Repair by Cold Planing and/or Recycling at Various Locations  
(PN:RB96) - Waiver of Formal Bidding Procedures and Authorization to Award a Contract

SUMMARY

Specifications for this project have been prepared. Waiver of formal bidding procedures and authorization to award a contract is recommended.

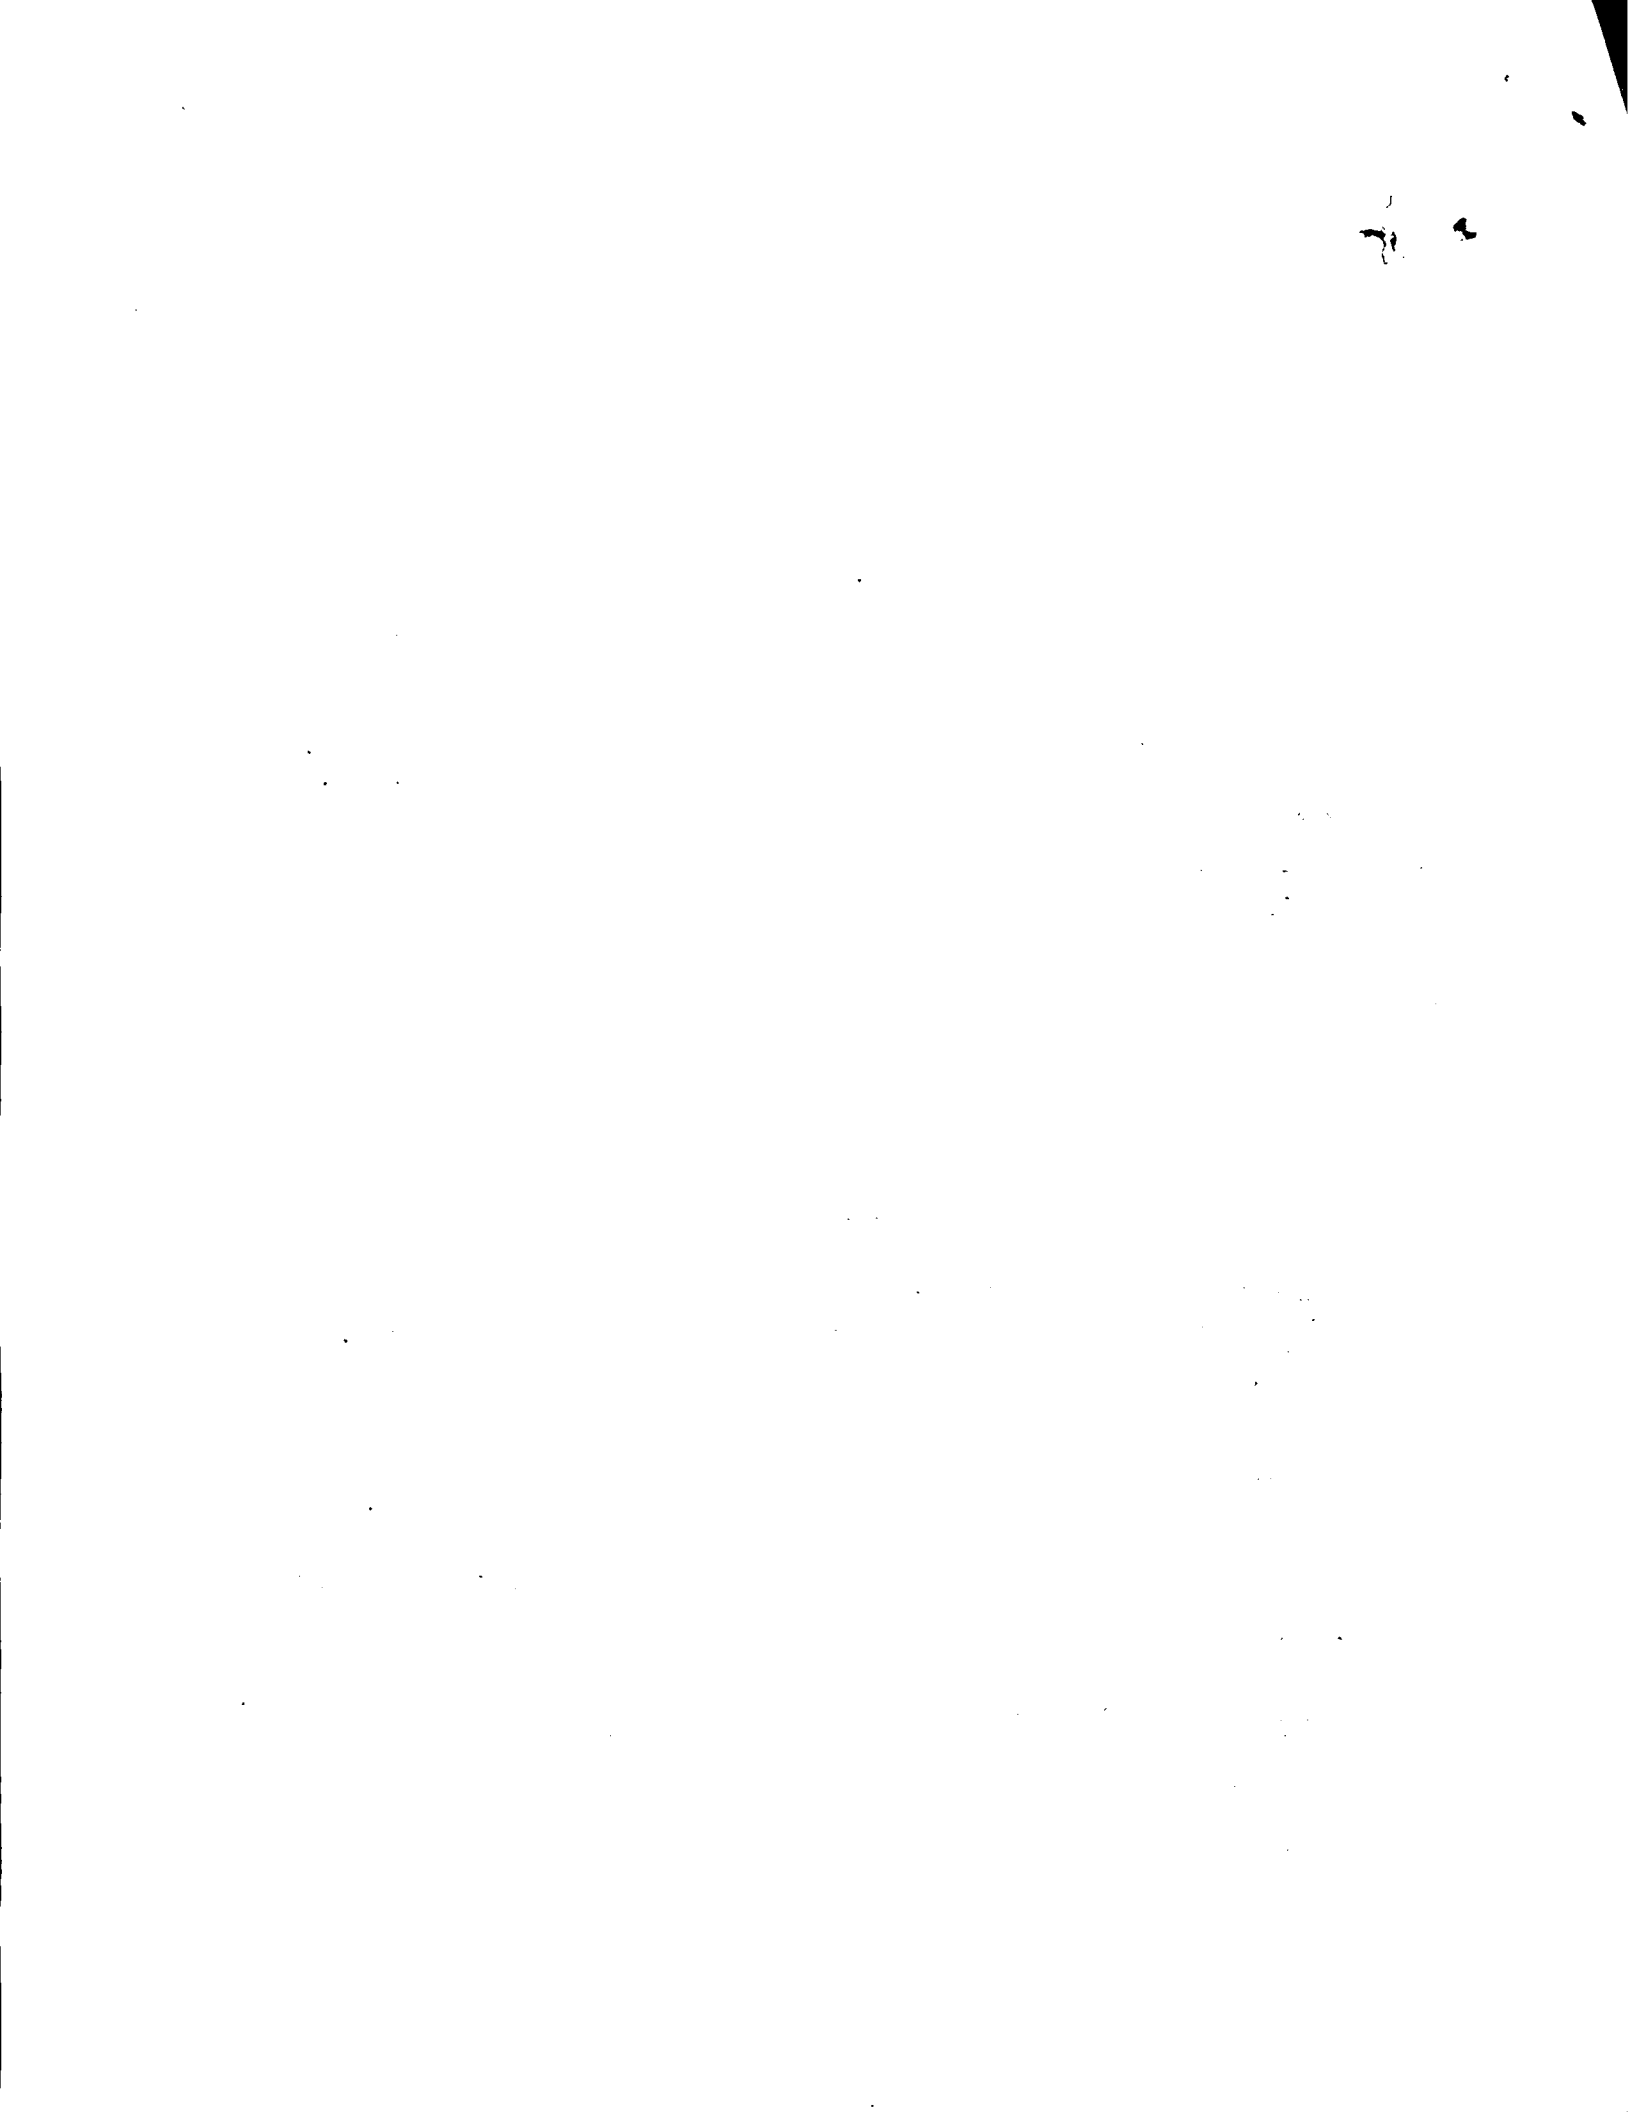

BACKGROUND

The Street Division of the Department of Public Works performs street repairs when small areas of street sections at various locations become defective. The repair work required the use of a grinder and operator to remove the defective street section by cold planing and/or recycling the pavement. The contractor for this specialized service is used on an on-call basis for time and material and must be available upon 72 hour notification to perform the work at various locations throughout the City.

A survey of contractors in the Sacramento area has shown the previous contractor, Anrak Corporation, to be the only company in the entire area capable of providing the required specialized service within the specified time restraints. Anrak Corporation has stated that they would accept a contract at the same price per hour, \$439 per hour, as the contract under which they have been operating for the past two years.

FINANCIAL DATA

Sufficient funds are available for this project. The estimated total project cost is \$100,000. The current budget for fiscal year 1989/90 for base repairs, which includes this project and other items, is \$200,000, which was approved in the Capital Improvement Program from Gas Tax Funds (202). The funds currently available for this project amount to \$163,400 as of July 17, 1989.
