Honorable Members In Session:

SUBJECT: Well No. 153 (New) - State Health Department
Application For Permit To Use Well As Water Source

SUMMARY

Any new source of water to a municipal water system must be approved by the State Department of Health. Procedure and format are specified in the State Health and Safety Code. The attached resolution authorizing the City Manager to prepare and file an application is part of the prescribed procedure. Adoption is recommended.

BACKGROUND

The City operates its water system under a permit issued by the State Department of Health. Any change or addition to sources must be approved by that agency. The City has just completed construction of a new well, No. 153, at Main Ave. and Rio Linda Blvd. A report on depth, method of construction, and chemical and bacteriological analysis will accompany the City's application for approval. The application is rather routine and no difficulties are anticipated. Plans and specifications were reviewed by State Health Department personnel, and their suggestions incorporated before advertising the construction contract. Wording of the attached resolution follows the format prescribed by that agency. A copy of the resolution must be attached to the City's application.

FINANCIAL

There are no costs involved in filing the application.
