City Council
Sacramento, California

Honorable Members in Session

SUBJECT: Park Patrol Status Report

CITY MANAGER'S OFFICE
RECEIVED
DEC 18 1987

The new Park Enforcement program is scheduled to be operating by April 2, 1988. The program will be staffed by one (1) sergeant and six (6) police officers. Each of the officers will be paired with a full service police dog. The primary assignment for these officers will be the maintenance of social order within the city park system. The following is an update of the status regarding the implementation of this program.

PHASE I

Phase I primarily consisted of the planning and research necessary to identify, locate, assign and procure appropriate personnel, animals and equipment.

To date, officers and temporary vehicles have been selected and assigned. Currently, approximately 50 animals have been located and tested to determine their suitability for police service. As a result of the testing process, one (1) animal has been found acceptable and placed with an officer assigned to the Park Enforcement Unit.

The procurement of permanent Park Enforcement/K-9 vehicles is currently being studied by Fleet Management.

In order to meet the April 2, 1988, program initiation date, five (5) suitable animals must be located and procured no later than January 9, 1988.

To date, every effort is being made to locate, identify and procure the needed animals.

BY THE CITY COUNCIL
OFFICE OF THE CITY CLERK

CAUTION

Currently, those officers assigned to the Park Enforcement detail are working as crime suppression officers or doing background investigations on Police/Community Service Officer candidates.

PHASE II

Once all six (6) animals are on board, training for both officers and animals will commence. The training will be extensive and necessary to ensure quality full service K-9s and efficient, professional officer/handlers.

PHASE III

The actual deployment of officers and animals within the city park system is scheduled to take place no later than April 2, 1988. The officers will begin patrolling the parks even if the animals are not fully trained. Should the weather in March, 1988, become warmer than usual and park attendance increase, deployment may be implemented at an earlier date. Normally, full deployment will continue through October. Patrol of the parks during the winter months will be provided as required.

Priority scheduling of the officers within the park system will be established by the Police Department and the Parks & Community Services Department. If deployment does occur before canine training is complete, the officers and dogs will train one to two hours per day until proficient.

Respectfully submitted,

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that this is crucial for ensuring transparency and accountability in the organization's operations.

2. The second part of the document outlines the various methods and tools used to collect and analyze data. It highlights the need for consistent and reliable data collection processes to support effective decision-making.

3. The third part of the document focuses on the role of technology in data management and analysis. It discusses how modern software solutions can streamline data collection, storage, and reporting, thereby improving efficiency and accuracy.

4. The fourth part of the document addresses the challenges associated with data management, such as data quality, security, and privacy. It provides strategies to mitigate these risks and ensure that data is used responsibly and ethically.

5. The fifth part of the document concludes by summarizing the key findings and recommendations. It stresses the importance of ongoing monitoring and evaluation to ensure that data management practices remain effective and aligned with the organization's goals.

6. The sixth part of the document provides a detailed overview of the data management framework, including the roles and responsibilities of various stakeholders involved in the process.

7. The seventh part of the document discusses the integration of data management with other organizational systems and processes, ensuring a cohesive and integrated approach to data handling.

8. The eighth part of the document offers practical advice and best practices for implementing a robust data management strategy, drawing on real-world examples and case studies.

9. The ninth part of the document addresses the future of data management, exploring emerging trends and technologies that will shape the way organizations handle their data in the coming years.

10. The tenth part of the document provides a final summary and a call to action, encouraging all stakeholders to take ownership of their data and work together to achieve the organization's strategic objectives.
