City Council
Sacramento, California

Honorable Members in Session:

SUBJECT: Stop Signs - Commons Drive and Swarthmore Drive

APPROVED
BY THE CITY COUNCIL

NOV 24 1981

OFFICE OF THE
CITY CLERK

SUMMARY

Councilman Pope has requested that this item be placed on the Agenda. This report gives the staff position on the issue.

BACKGROUND INFORMATION

Commons Drive is a 4500-foot long street constructed in a curvilinear pattern through the Campus Commons development. It is the longest uninterrupted street in the whole development. Swarthmore Drive connects Commons Drive to Howe Avenue on the east and is a short dead-end street west of Commons Drive. Stop signs were placed on Swarthmore at Commons when the streets were constructed.

The Traffic Engineering office has received many requests for stop signs and undulations to control speed on Commons Drive. This street is on the priority list for undulations but they probably will not be constructed for several years. In August 1981, stop signs were placed on Commons Drive at Swarthmore under the Council's policy of utilizing stop signs for speed control. Since there were already stop signs on Swarthmore, this resulted in a 4-way stop at the intersection.

Since this intersection does not meet any of the requirements for 4-way stop control, it was decided to remove the stop signs on Swarthmore. The standard procedure for reversing stop signs at an intersection is to install the two new signs making a temporary 4-way stop. After a month or so, we remove the old signs. We do this because abruptly reversing the signs would cause a definite hazard. This procedure has been used at many locations to avoid unnecessary 4-way stops.

Office of the City Clerk
Cmt. to
11-24-81
NOV 17 1981

33

After the stop signs were removed on Swarthmore, many residents of Campus Commons contacted this office about the matter. Some of them were satisfied with the above explanation but others were not. During these conversations, references were made to a fatal accident that occurred at this location. The fatal accident occurred on December 21, 1978 north of the intersection of Commons Drive and Swarthmore Drive. It involved a pedestrian crossing at a mid-block location that was struck by a northbound vehicle driving away from the intersection in question. The accident happened at night and the driver reported that she did not see the pedestrian until it was too late to stop.

The only accident our records show at the intersection of Swarthmore and Commons involved a stolen vehicle that ran the stop sign at a high rate of speed, lost control while attempting to make a turn and hit a parked car. The driver and passenger left the scene of the accident and were picked up later.

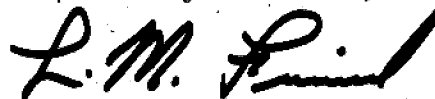

FINANCIAL DATA

None.

RECOMMENDATION

It is recommended that since stop signs have been placed on Commons Drive in conformance with the Council's speed control policy and since there is no justification for 4-way stops at the intersection of Commons Drive and Swarthmore Drive, the stop sign arrangement should remain as posted.

Respectfully submitted,

L. M. Frink
Traffic Engineer

Recommendation Approved:

Walter J. Slife, City Manager

Dear Fellow Nepenthe Residents;

You may recall the item in the most recent Nepenthe Bulletin regarding the unannounced removal by the City Traffic Department of the two stop signs at Swarthmore and Commons. Incredibly, this followed by just weeks the long-sought installation of the two new signs on Commons Drive at that intersection making it at long last, but all too briefly, a four-way stop.

It was also reported that due to growing speed and traffic volume and a fatality which already occurred there, the Nepenthe Board and several concerned residents have asked Councilman Doug Pope to get the signs replaced.

Concern about this matter has been heightened by the imminent growth in work and home-bound short cutting traffic due to the occupancy of 100,000 feet of office space across Howe Avenue, and activation of the signal at that intersection. The Swarthmore stop signs will be needed even more to slow down and discourage this type of traffic.

Regrettably, the Traffic Department has refused Councilman Pope's request, and he has agreed to take the matter to the City Council. He has advised us to prepare for this by gathering as many petition signatures as possible, contacting other Council members, and attending in significant numbers the as-yet unscheduled Council meeting.

We therefore urge you to return, as soon as possible to the Nepenthe Clubhouse office, the petition form below with as many signatures as possible, and to remind your neighbors to do so! Also, please check the appropriate questionnaire boxes. Your help is needed and appreciated.

In advance, Thank You!

Sincerely,
Nepenthe Association
Board of Directors

In recognition of the hazards resulting from the growing traffic, speed, and volume at the corner of Swarthmore and Commons Drives, we the undersigned nearby residents strongly protest the unilateral removal of the two Swarthmore stop signs by the City Traffic Department, and respectfully urge the Sacramento City Council to take the following actions:

- Direct the Traffic Department to replace the two Swarthmore stop signs that have been removed.
- Direct the Traffic Department not to remove the two Commons Drive stop signs presently in place, thus restoring a four-way stop arrangement at this intersection.
- Direct the Traffic Department to establish four crosswalks at this intersection.

M. J. Masley

Merran J. Masley

I agree that the Nepenthe Association should seek restoration of the removed stop signs and installation of crosswalks:

Regrettably, the Traffic Department has refused Councilman Pope's request, and he has agreed to take the matter to the City Council. He has advised us to prepare for this by gathering as many petition signatures as possible, contacting other Council members, and attending in significant numbers the as-yet unscheduled Council meeting.

We therefore urge you to return, as soon as possible to the Nepenthe Clubhouse office, the petition form below with as many signatures as possible, and to remind your neighbors to do so! Also, please check the appropriate questionnaire boxes. Your help is needed and appreciated.

In advance, Thank You!

Sincerely,
Nepenthe Association
Board of Directors

In recognition of the hazards resulting from the growing traffic, speed, and volume at the corner of Swarthmore and Commons Drives, we the undersigned nearby residents strongly protest the unilateral removal of the two Swarthmore stop signs by the City Traffic Department, and respectfully urge the Sacramento City Council to take the following actions:

- Direct the Traffic Department to replace the two Swarthmore stop signs that have been removed.
- Direct the Traffic Department not to remove the two Commons Drive stop signs presently in place, thus restoring a four-way stop arrangement at this intersection.
- Direct the Traffic Department to establish four crosswalks at this intersection.

SPECIAL BULLETIN

#33 11-24-81

Dear Fellow Nepenthe Residents;

You may recall the item in the most recent Nepenthe Bulletin regarding the unannounced removal by the City Traffic Department of the two stop signs at Swarthmore and Commons. Incredibly, this followed by just weeks the long-sought installation of the two new signs on Commons Drive at that intersection making it at long last, but all too briefly, a four-way stop.

It was also reported that due to growing speed and traffic volume and a fatality which already occurred there, the Nepenthe Board and several concerned residents have asked Councilman Doug Pope to get the signs replaced.

Concern about this matter has been heightened by the imminent growth in work and home-bound short cutting traffic due to the occupancy of 100,000 feet of office space across Howe Avenue, and activation of the signal at that intersection. The Swarthmore stop signs will be needed even more to slow down and discourage this type of traffic.

Regrettably, the Traffic Department has refused Councilman Pope's request, and he has agreed to take the matter to the City Council. He has advised us to prepare for this by gathering as many petition signatures as possible, contacting other Council members, and attending in significant numbers the as-yet unscheduled Council meeting.

We therefore urge you to return, as soon as possible to the Nepenthe Clubhouse office, the petition form below with as many signatures as possible, and to remind your neighbors to do so! Also, please check the appropriate questionnaire boxes. Your help is needed and appreciated.

- Direct the Traffic Department to establish four crosswalks at this intersection.

Cross-walks suggest over-kill of the immediate situation -

Request should be amended to exclude cross-walk

Restoration inclusion

* Note - emphasis should be added that the blind portion of the intersection is now un-controlled - (the n/e + NW Arc blind to E & W traffic)

I agree that the Nepenthe Association should seek restoration of the removed stop signs ~~and installation of crosswalks.~~

In recognition of the hazards resulting from the growing traffic, speed, and volume at the corner of Swarthmore and Commons Drives, we the undersigned nearby residents strongly protest the unilateral removal of the two Swarthmore stop signs by the City Traffic Department, and respectfully urge the Sacramento City Council to take the following actions:

- Direct the Traffic Department to replace the two Swarthmore stop signs that have been removed.
- Direct the Traffic Department not to remove the two Commons Drive stop signs presently in place, thus restoring a four-way stop arrangement at this intersection.
- Direct the Traffic Department to establish four crosswalks at this intersection.

SPECIAL BULLETIN

11-24-81

BB

Dear Fellow Nepenthe Residents;

You may recall the item in the most recent Nepenthe Bulletin regarding the unannounced removal by the City Traffic Department of the two stop signs at Swarthmore and Commons. Incredibly, this followed by just weeks the long-sought installation of the two new signs on Commons Drive at that intersection making it at long last, but all too briefly, a four-way stop.

It was also reported that due to growing speed and traffic volume and a fatality which already occurred there, the Nepenthe Board and several concerned residents have asked Councilman Doug Pope to get the signs replaced.

Concern about this matter has been heightened by the imminent growth in work and home-bound short cutting traffic due to the occupancy of 100,000 feet of office space across Howe Avenue, and activation of the signal at that intersection. The Swarthmore stop signs will be needed even more to slow down and discourage this type of traffic.

Regrettably, the Traffic Department has refused Councilman Pope's request, and he has agreed to take the matter to the City Council. He has advised us to prepare for this by gathering as many petition signatures as possible, contacting other Council members, and attending in significant numbers the as-yet unscheduled Council meeting.

We therefore urge you to return, as soon as possible to the Nepenthe Clubhouse office, the petition form below with as many signatures as possible, and to remind your neighbors to do so! Also, please check the appropriate questionnaire boxes. Your help is needed and appreciated.

In advance, Thank You!

Sincerely,
Nepenthe Association
Board of Directors

Incredibly, this followed by just weeks the long-sought installation of the two new signs on Commons Drive at that intersection making it at long last, but all too briefly, a four-way stop.

It was also reported that due to growing speed and traffic volume and a fatality which already occurred there, the Nepenthe Board and several concerned residents have asked Councilman Doug Pope to get the signs replaced.

Concern about this matter has been heightened by the imminent growth in work and home-bound short cutting traffic due to the occupancy of 100,000 feet of office space across Howe Avenue, and activation of the signal at that intersection. The Swarthmore stop signs will be needed even more to slow down and discourage this type of traffic.

Regrettably, the Traffic Department has refused Councilman Pope's request, and he has agreed to take the matter to the City Council. He has advised us to prepare for this by gathering as many petition signatures as possible, contacting other Council members, and attending in significant numbers the as-yet unscheduled Council meeting.

We therefore urge you to return, as soon as possible to the Nepenthe Clubhouse office, the petition form below with as many signatures as possible, and to remind your neighbors to do so! Also, please check the appropriate questionnaire boxes. Your help is needed and appreciated.

In advance, Thank You!

Sincerely,
Nepenthe Association
Board of Directors

In recognition of the hazards resulting from the growing traffic, speed, and volume at the corner of Swarthmore and Commons Drives, we the undersigned nearby residents strongly protest the unilateral removal of the two Swarthmore stop signs by the City Traffic Department, and respectfully urge the Sacramento City Council to take the following actions:

- Direct the Traffic Department to replace the two Swarthmore stop signs that have been removed.
- Direct the Traffic Department not to remove the two Commons Drive stop signs presently in place, thus restoring a four-way stop arrangement at this intersection.
- Direct the Traffic Department to establish four crosswalks at this intersection.

It was also reported that due to growing speed and traffic volume and a fatality which already occurred there, the Nepenthe Board and several concerned residents have asked Councilman Doug Pope to get the signs replaced.

Concern about this matter has been heightened by the imminent growth in work and home-bound short cutting traffic due to the occupancy of 100,000 feet of office space across Howe Avenue, and activation of the signal at that intersection. The Swarthmore stop signs will be needed even more to slow down and discourage this type of traffic.

Regrettably, the Traffic Department has refused Councilman Pope's request, and he has agreed to take the matter to the City Council. He has advised us to prepare for this by gathering as many petition signatures as possible, contacting other Council members, and attending in significant numbers the as-yet unscheduled Council meeting.

We therefore urge you to return, as soon as possible to the Nepenthe Clubhouse office, the petition form below with as many signatures as possible, and to remind your neighbors to do so! Also, please check the appropriate questionnaire boxes. Your help is needed and appreciated.

In advance, Thank You!

Sincerely,
Nepenthe Association
Board of Directors

In recognition of the hazards resulting from the growing traffic, speed, and volume at the corner of Swarthmore and Commons Drives, we the undersigned nearby residents strongly protest the unilateral removal of the two Swarthmore stop signs by the City Traffic Department, and respectfully urge the Sacramento City Council to take the following actions:

- Direct the Traffic Department to replace the two Swarthmore stop signs that have been removed.
- Direct the Traffic Department not to remove the two Commons Drive stop signs presently in place, thus restoring a four-way stop arrangement at this intersection.
- Direct the Traffic Department to establish four crosswalks at this intersection.

SPECIAL BULLETIN

#33 11.24.81

Dear Fellow Nepenthe Residents;

You may recall the item in the most recent Nepenthe Bulletin regarding the unannounced removal by the City Traffic Department of the two stop signs at Swarthmore and Commons. Incredibly, this followed by just weeks the long-sought installation of the two new signs on Commons Drive at that intersection making it at long last, but all too briefly, a four-way stop.

It was also reported that due to growing speed and traffic volume and a fatality which already occurred there, the Nepenthe Board and several concerned residents have asked Councilman Doug Pope to get the signs replaced.

Concern about this matter has been heightened by the imminent growth in work and home-bound short cutting traffic due to the occupancy of 100,000 feet of office space across Howe Avenue, and activation of the signal at that intersection. The Swarthmore stop signs will be needed even more to slow down and discourage this type of traffic.

Regrettably, the Traffic Department has refused Councilman Pope's request, and he has agreed to take the matter to the City Council. He has advised us to prepare for this by gathering as many petition signatures as possible, contacting other Council members, and attending in significant numbers the as-yet unscheduled Council meeting.

Nepenthe Association
Board of Directors

In recognition of the hazards resulting from the growing traffic, speed, and volume at the corner of Swarthmore and Commons Drives, we the undersigned nearby residents strongly protest the unilateral removal of the two Swarthmore stop signs by the City Traffic Department, and respectfully urge the Sacramento City Council to take the following actions:

- Direct the Traffic Department to replace the two Swarthmore stop signs that have been removed.
- Direct the Traffic Department not to remove the two Commons Drive stop signs presently in place, thus restoring a four-way stop arrangement at this intersection.
- Direct the Traffic Department to establish four crosswalks at this intersection.

Renie Padgett

I agree that the Nepenthe Association should seek restoration of the removed stop signs and installation of crosswalks:

SPECIAL BULLETIN

Dear Fellow Nepenthe Residents;

You may recall the item in the most recent Nepenthe Bulletin regarding the unannounced removal by the City Traffic Department of the two stop signs at Swarthmore and Commons. Incredibly, this followed by just weeks the long-sought installation of the two new signs on Commons Drive at that intersection making it at long last, but all too briefly, a four-way stop.

It was also reported that due to growing speed and traffic volume and a fatality which already occurred there, the Nepenthe Board and several concerned residents have asked Councilman Doug Pope to get the signs replaced.

Concern about this matter has been heightened by the imminent growth in work and home-bound short cutting traffic due to the occupancy of 100,000 feet of office space across Howe Avenue, and activation of the signal at that intersection. The Swarthmore stop signs will be needed even more to slow down and discourage this type of traffic.

Regrettably, the Traffic Department has refused Councilman Pope's request, and he has agreed to take the matter to the City Council. He has advised us to prepare for this by gathering as many petition signatures as possible, contacting other Council members, and attending in significant numbers the as-yet unscheduled Council meeting.

We therefore urge you to return, as soon as possible to the Nepenthe Clubhouse office, the petition form below with as many signatures as possible, and to remind your neighbors to do so! Also, please check the appropriate questionnaire boxes. Your help is needed and appreciated.

In advance, Thank You!

Sincerely,
Nepenthe Association
Board of Directors

Since you have stated that a fatality has already occurred at Swathmore & Commons, suggest you (Board of Directors) consider a stop sign at the Vanderbilt entrance to Commons Dr. Coming from upper Dunbarton (South) I have had several observations of close calls of cars entering Commons Dr without consideration of traffic from the right. No particular slow down in entering & turning north (left) at Commons. As a preventative to another fatality, recommend this suggestion be given positive consideration.

Dear Fellow Nepenthe Residents;

You may recall the item in the most recent Nepenthe Bulletin regarding the unannounced removal by the City Traffic Department of the two stop signs at Swarthmore and Commons. Incredibly, this followed by just weeks the long-sought installation of the two new signs on Commons Drive at that intersection making it at long last, but all too briefly, a four-way stop.

It was also reported that due to growing speed and traffic volume and a fatality which already occurred there, the Nepenthe Board and several concerned residents have asked Councilman Doug Pope to get the signs replaced.

Concern about this matter has been heightened by the imminent growth in work and home-bound short cutting traffic due to the occupancy of 100,000 feet of office space across Howe Avenue, and activation of the signal at that intersection. The Swarthmore stop signs will be needed even more to slow down and discourage this type of traffic.

Regrettably, the Traffic Department has refused Councilman Pope's request, and he has agreed to take the matter to the City Council. He has advised us to prepare for this by gathering as many petition signatures as possible, contacting other Council members, and attending in significant numbers the as-yet unscheduled Council meeting.

We therefore urge you to return, as soon as possible to the Nepenthe Clubhouse office, the petition form below with as many signatures as possible, and to remind your neighbors to do so! Also, please check the appropriate questionnaire boxes. Your help is needed and appreciated.

In advance, Thank You!

Sincerely,
Nepenthe Association
Board of Directors

In recognition of the hazards resulting from the growing traffic, speed, and volume at the corner of Swarthmore and Commons Drives, we the undersigned nearby residents strongly protest the unilateral removal of the two Swarthmore stop signs by the City Traffic Department, and respectfully urge the Sacramento City Council to take the following actions:

- Direct the Traffic Department to replace the two Swarthmore stop signs that have been removed.
- Direct the Traffic Department not to remove the two Commons Drive stop signs presently in place, thus restoring a four-way stop arrangement at this intersection.
- Direct the Traffic Department to establish four crosswalks at this intersection.

SPECIAL BULLETIN

11-24-81
#23

Dear Fellow Nepenthe Residents;

You may recall the item in the most recent Nepenthe Bulletin regarding the unannounced removal by the City Traffic Department of the two stop signs at Swarthmore and Commons. Incredibly, this followed by just weeks the long-sought installation of the two new signs on Commons Drive at that intersection making it at long last, but all too briefly, a four-way stop.

It was also reported that due to growing speed and traffic volume and a fatality which already occurred there, the Nepenthe Board and several concerned residents have asked Councilman Doug Pope to get the signs replaced.

Concern about this matter has been heightened by the imminent growth in work and home-bound short cutting traffic due to the occupancy of 100,000 feet of office space across Howe Avenue, and activation of the signal at that intersection. The Swarthmore stop signs will be needed even more to slow down and discourage this type of traffic.

Regrettably, the Traffic Department has refused Councilman Pope's request, and he has agreed to take the matter to the City Council. He has advised us to prepare for this by gathering as many petition signatures as possible, contacting other Council members, and attending in significant numbers the as-yet-unscheduled Council meeting.

We therefore urge you to return, as soon as possible to the Nepenthe Clubhouse office, the petition form below with as many signatures as possible, and to remind your neighbors to do so! Also, please check the appropriate questionnaire boxes. Your help is needed and appreciated.

In advance, Thank You!

Sincerely,
Nepenthe Association
Board of Directors

In recognition of the hazards resulting from the growing traffic, speed, and volume at the corner of Swarthmore and Commons Drives, we the undersigned nearby residents strongly protest the unilateral removal of the two Swarthmore stop signs by the City Traffic Department, and respectfully urge the Sacramento City Council to take the following actions:

- Direct the Traffic Department to replace the two Swarthmore stop signs that have been removed.
- Direct the Traffic Department not to remove the two Commons Drive stop signs presently in place, thus restoring a four-way stop arrangement at this intersection.
- Direct the Traffic Department to establish four crosswalks at this intersection.

Mrs. James A. Jolly
Dr. James A. Jolly

Incredibly, this followed by just weeks the long-sought installation of the two new signs on Commons Drive at that intersection making it at long last, but all too briefly, a four-way stop.

It was also reported that due to growing speed and traffic volume and a fatality which already occurred there, the Nepenthe Board and several concerned residents have asked Councilman Doug Pope to get the signs replaced.

Concern about this matter has been heightened by the imminent growth in work and home-bound short cutting traffic due to the occupancy of 100,000 feet of office space across Howe Avenue, and activation of the signal at that intersection. The Swarthmore stop signs will be needed even more to slow down and discourage this type of traffic.

Regrettably, the Traffic Department has refused Councilman Pope's request, and he has agreed to take the matter to the City Council. He has advised us to prepare for this by gathering as many petition signatures as possible, contacting other Council members, and attending in significant numbers the as-yet unscheduled Council meeting.

We therefore urge you to return, as soon as possible to the Nepenthe Clubhouse office, the petition form below with as many signatures as possible, and to remind your neighbors to do so! Also, please check the appropriate questionnaire boxes. Your help is needed and appreciated.

In advance, Thank You!

Sincerely,
Nepenthe Association
Board of Directors

In recognition of the hazards resulting from the growing traffic, speed, and volume at the corner of Swarthmore and Commons Drives, we the undersigned nearby residents strongly protest the unilateral removal of the two Swarthmore stop signs by the City Traffic Department, and respectfully urge the Sacramento City Council to take the following actions:

- Direct the Traffic Department to replace the two Swarthmore stop signs that have been removed.
- Direct the Traffic Department not to remove the two Commons Drive stop signs presently in place, thus restoring a four-way stop arrangement at this intersection.
- Direct the Traffic Department to establish four crosswalks at this intersection.

Ramon Garcia

I agree that the Nepenthe Association should seek restoration of the removed stop signs and installation of crosswalks:

YES NO

I am acquainted with the following Council members and will contact them about this:

If available, I would be willing to attend the City Council meeting. Please notify me when it is scheduled at

Dear Fellow Nepenthe Residents;

You may recall the item in the most recent Nepenthe Bulletin regarding the unannounced removal by the City Traffic Department of the two stop signs at Swarthmore and Commons. Incredibly, this followed by just weeks the long-sought installation of the two new signs on Commons Drive at that intersection making it at long last, but all too briefly, a four-way stop.

It was also reported that due to growing speed and traffic volume and a fatality which already occurred there, the Nepenthe Board and several concerned residents have asked Councilman Doug Pope to get the signs replaced.

Concern about this matter has been heightened by the imminent growth in work and home-bound short cutting traffic due to the occupancy of 100,000 feet of office space across Howe Avenue, and activation of the signal at that intersection. The Swarthmore stop signs will be needed even more to slow down and discourage this type of traffic.

Regrettably, the Traffic Department has refused Councilman Pope's request, and he has agreed to take the matter to the City Council. He has advised us to prepare for this by gathering as many petition signatures as possible, contacting other Council members, and attending in significant numbers the as-yet unscheduled Council meeting.

We therefore urge you to return, as soon as possible to the Nepenthe Clubhouse office, the petition form below with as many signatures as possible, and to remind your neighbors to do so! Also, please check the appropriate questionnaire boxes. Your help is needed and appreciated.

In advance, Thank You!

Sincerely,
Nepenthe Association
Board of Directors

In recognition of the hazards resulting from the growing traffic, speed, and volume at the corner of Swarthmore and Commons Drives, we the undersigned nearby residents strongly protest the unilateral removal of the two Swarthmore stop signs by the City Traffic Department, and respectfully urge the Sacramento City Council to take the following actions:

- Direct the Traffic Department to replace the two Swarthmore stop signs that have been removed.
- Direct the Traffic Department not to remove the two Commons Drive stop signs presently in place, thus restoring a four-way stop arrangement at this intersection.
- Direct the Traffic Department to establish four crosswalks at this intersection.
