Subject: REPORT BACK ON FACILITY MANAGEMENT MID-YEAR BUDGET REQUEST

SUMMARY

The attached report provides justification for the Facility Management Division request for additional maintenance fund augmentation of \$133,000 as part of the mid-year budget adjustment.

RECOMMENDATION

It is recommended that the City Council adopt the attached resolution allocating \$133,000 to Facility Management Division for use in urgent maintenance projects and address the need for increasing maintenance staff during the FY 90-91 budget review.

Dear Mr. Rorer:

I am pleased to hear that you are planning to visit the University of Chicago in the near future.

I am sure that your visit will be most profitable to both of us.

I am sure that your visit will be most profitable to both of us.

Sincerely,

Honorable Members In Session:

SUBJECT: REPORT BACK ON FACILITY MANAGEMENT MID-YEAR BUDGET REQUEST

SUMMARY

This report provides justification for the Facility Management Division request for additional maintenance fund augmentation of \$133,000 as part of the mid-year budget adjustment.

BACKGROUND

The Facility Management Division provides complete mechanical, electrical and structural maintenance services for 282 buildings totaling almost 1.3 million sq ft. In this fiscal year, 174,008 square feet has been added and by the end of FY 90-91, another 151,232 square feet will be added to the workload. The square footage has increased 15.8% in the last three years and by the end of next year it will have increased 29.5%. However, the number of employees (51) performing or supporting the shop maintenance function has not increased since FY 86-87.

ANALYSIS

The significant addition of buildings and square footage to be maintained without a commensurate increase in personnel has begun to take its toll on maintaining City facilities. For example, a recent survey of 214 roofs found that 75 of them need to be replaced or

repaired. This backlog would take a crew of four, three years to complete; or, if the work was done by contract, the construction cost would be \$961,363. Similar backlogs are developing in fire station driveway repair, parking lot maintenance, painting, mechanical systems, window and door repairs, etc.

If the increase in workload is equated to personnel requirements, an additional 8 employees would be required in the current year ( $15.8\% \times 51 = 8$ ) and an additional 7 for next year ( $29.5\% \times 51 = 15$ ).

The need for additional permanent maintenance personnel is vital and if not addressed will result in higher repair and maintenance costs over the long run. However, with the augmentation of the requested \$133,000, some of the backlog can be addressed now with Limited Term employees and by contracting.

FINANCIAL DATA

The \$133,000 proposed for the Facility Management Division from the mid-year budget review would be used as follows:

a.	Hire two limited term Roofers	\$ 7,500
b.	Vehicles and equipment for Roofers	2,500
c.	Materials and supplies	10,000
d.	Contract services, various projects	<u>\$110,000</u>
	Total:	\$133,000

POLICY CONSIDERATIONS

Should \$133,000 of mid-year budget funds be allocated to facility maintenance? This report recommends that such funds be allocated in an effort to stop the sliding maintenance and repair resources provided to preserve the City's investment in its buildings.

Page Three

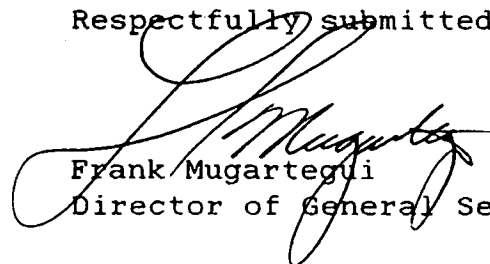

MBE/WBE EFFORTS

The Division will continue to search for and use minority/women-owned contractors and material suppliers.

RECOMMENDATION

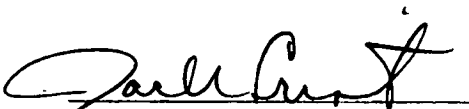

This report recommends that the Budget and Finance Committee approve this request and recommend that the City Council approve the attached resolution allocating \$133,000 to Facility Management Division for use in urgent maintenance projects and address the need for increasing maintenance staff during the FY 90-91 budget review.

Respectfully submitted,

Frank Mugartegui  
Director of General Services
