YOUNG MINDS GREEN SOLUTIONS

Know Your Planet, Protect Your Future

By the Golden Grizzlies

Background

- Climate change is one of the most pressing issues facing our world today.
- In Sacramento, 43% of homes are at significant risk of wildfire, and 44% are at risk of flooding.
- Youth deserve to understand what is happening to their planet and be given the tools to help protect their future.
- Environmental education increases awareness, knowledge and promotes critical thinking and problem solving skills.

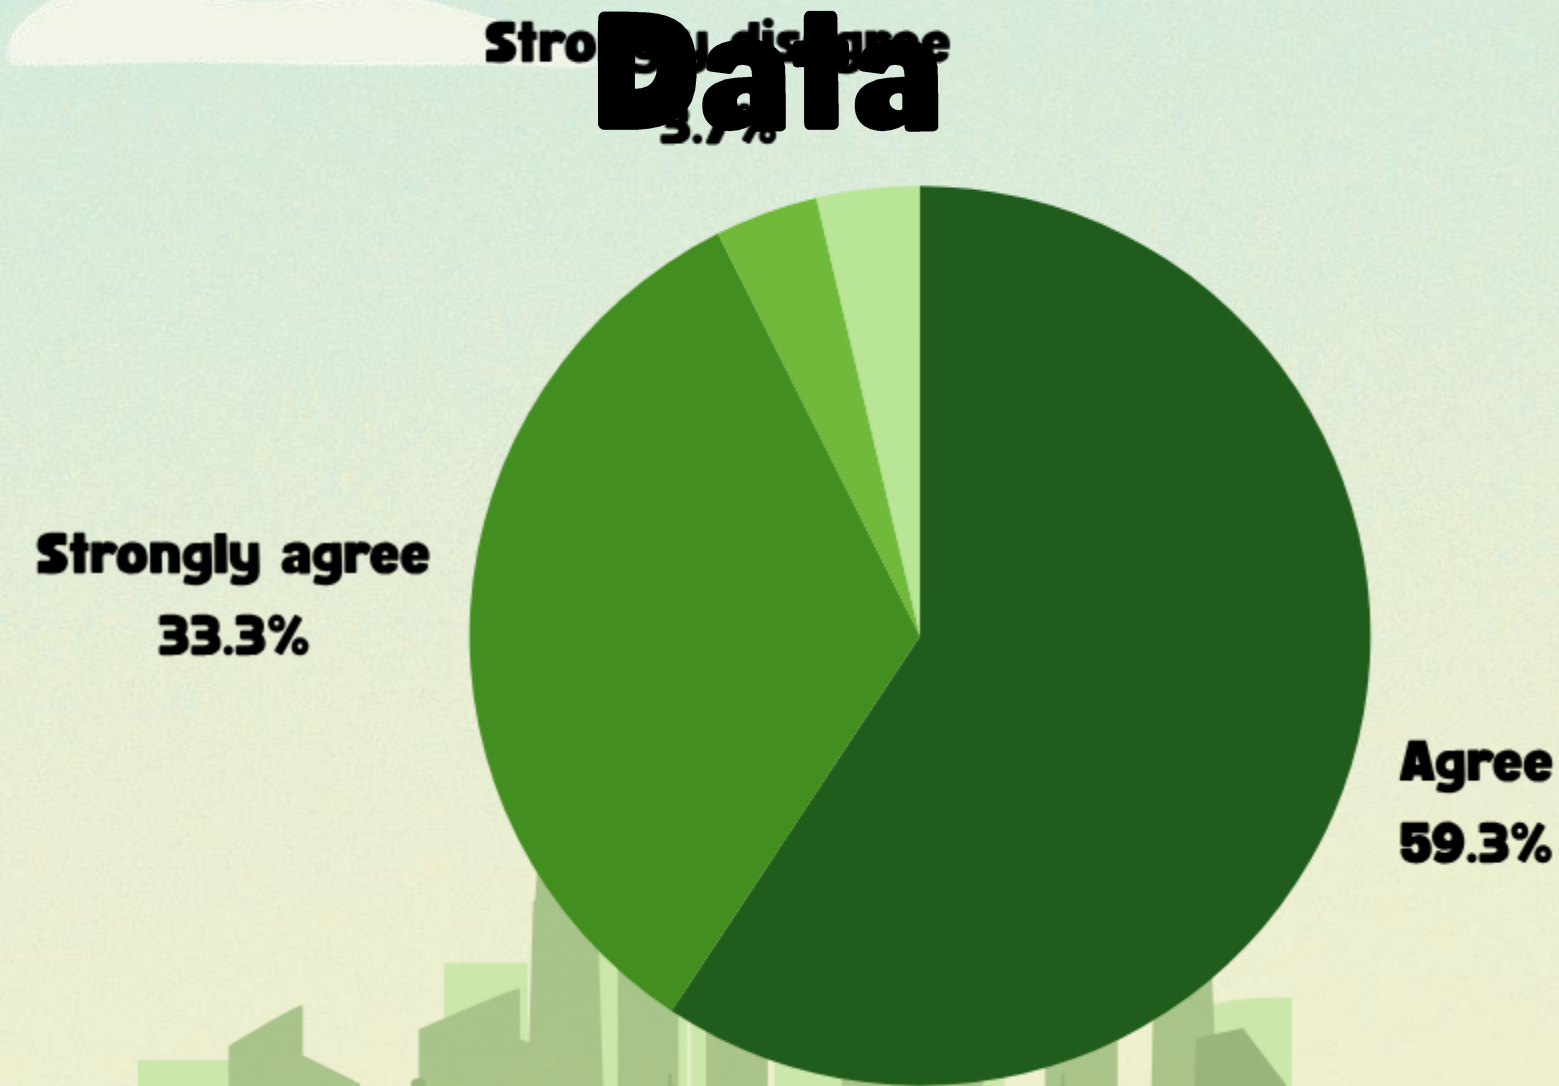

Statement of Purpose

The Golden Grizzlies would like to ask the Sacramento City Council for their support as we share youth-focused educational materials about climate change and climate action.

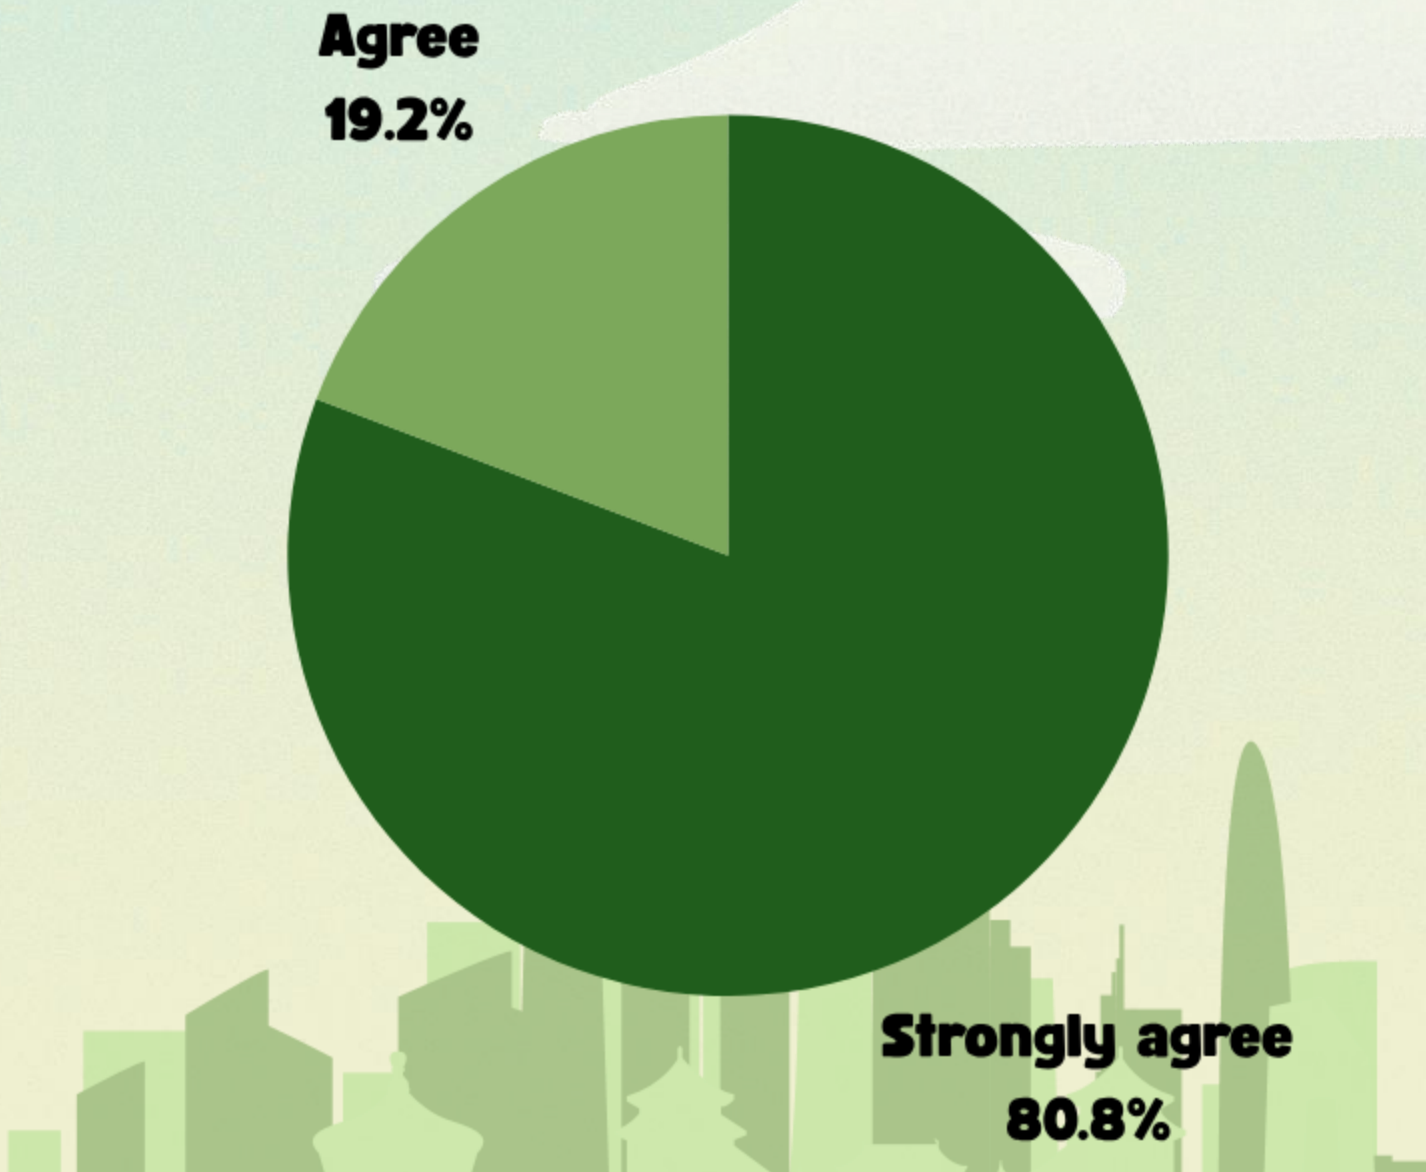

Teacher Form

Data

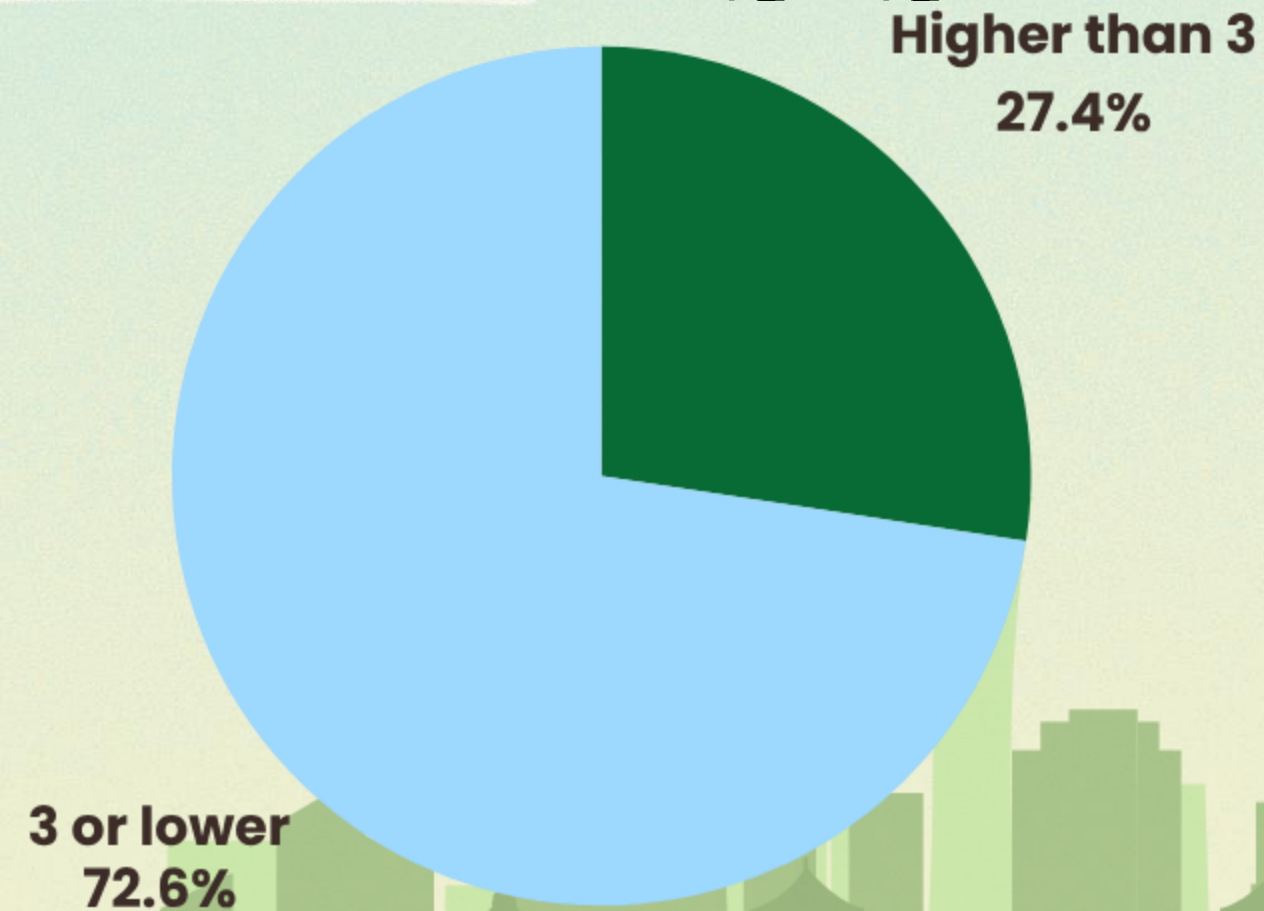

Over 92% of the teachers reported that their students showed interest in helping the planet.

100% of teachers surveyed expressed agreement that students would benefit from engaging climate activities.

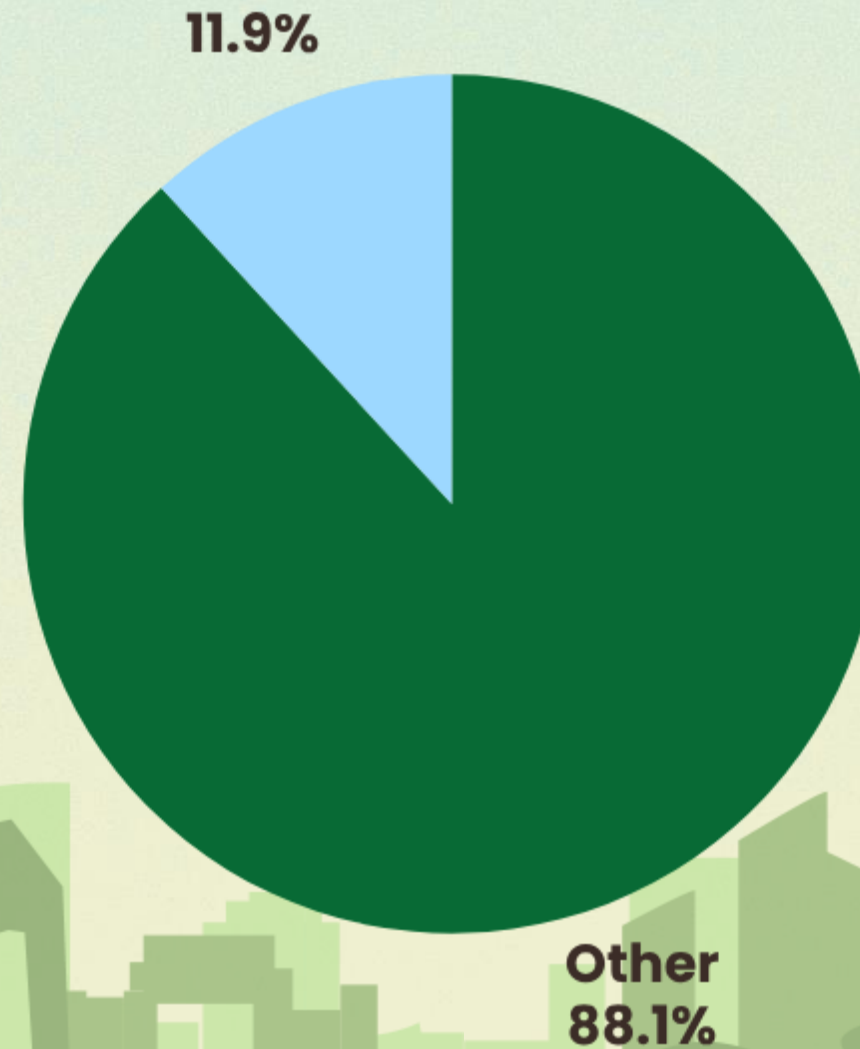

Student Form

Data

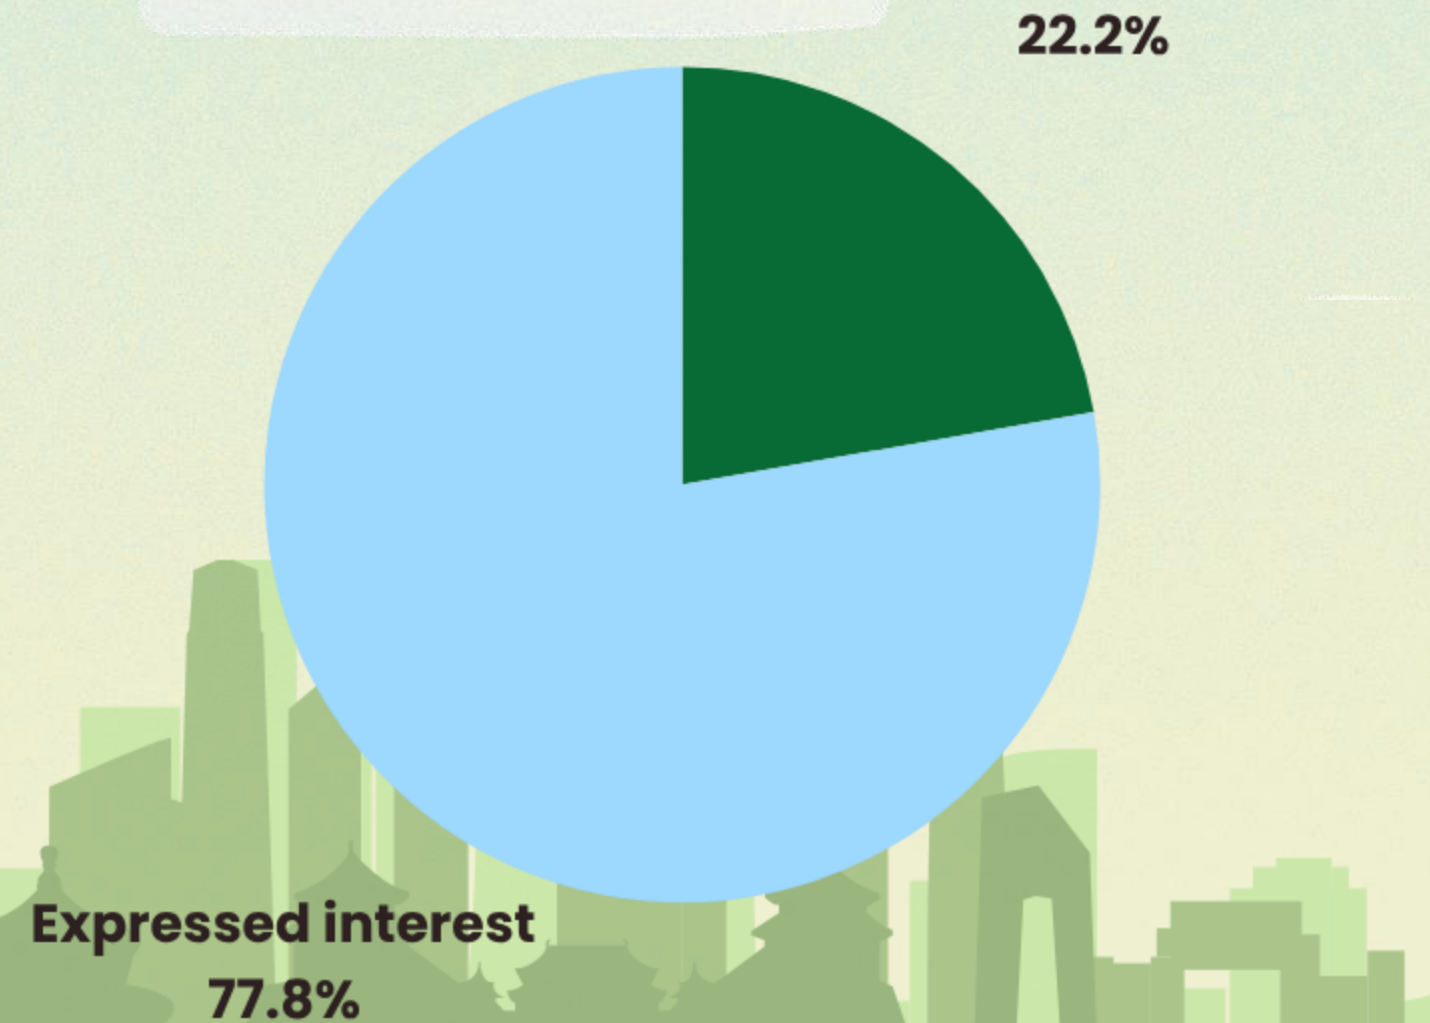

On a scale of 1 to 5, over 70% of students rated themselves a 3 or lower on how educated they feel about climate action.

Elementary School

Less than 12% of the students reported learning about climate topics in elementary school.

Did not express interest

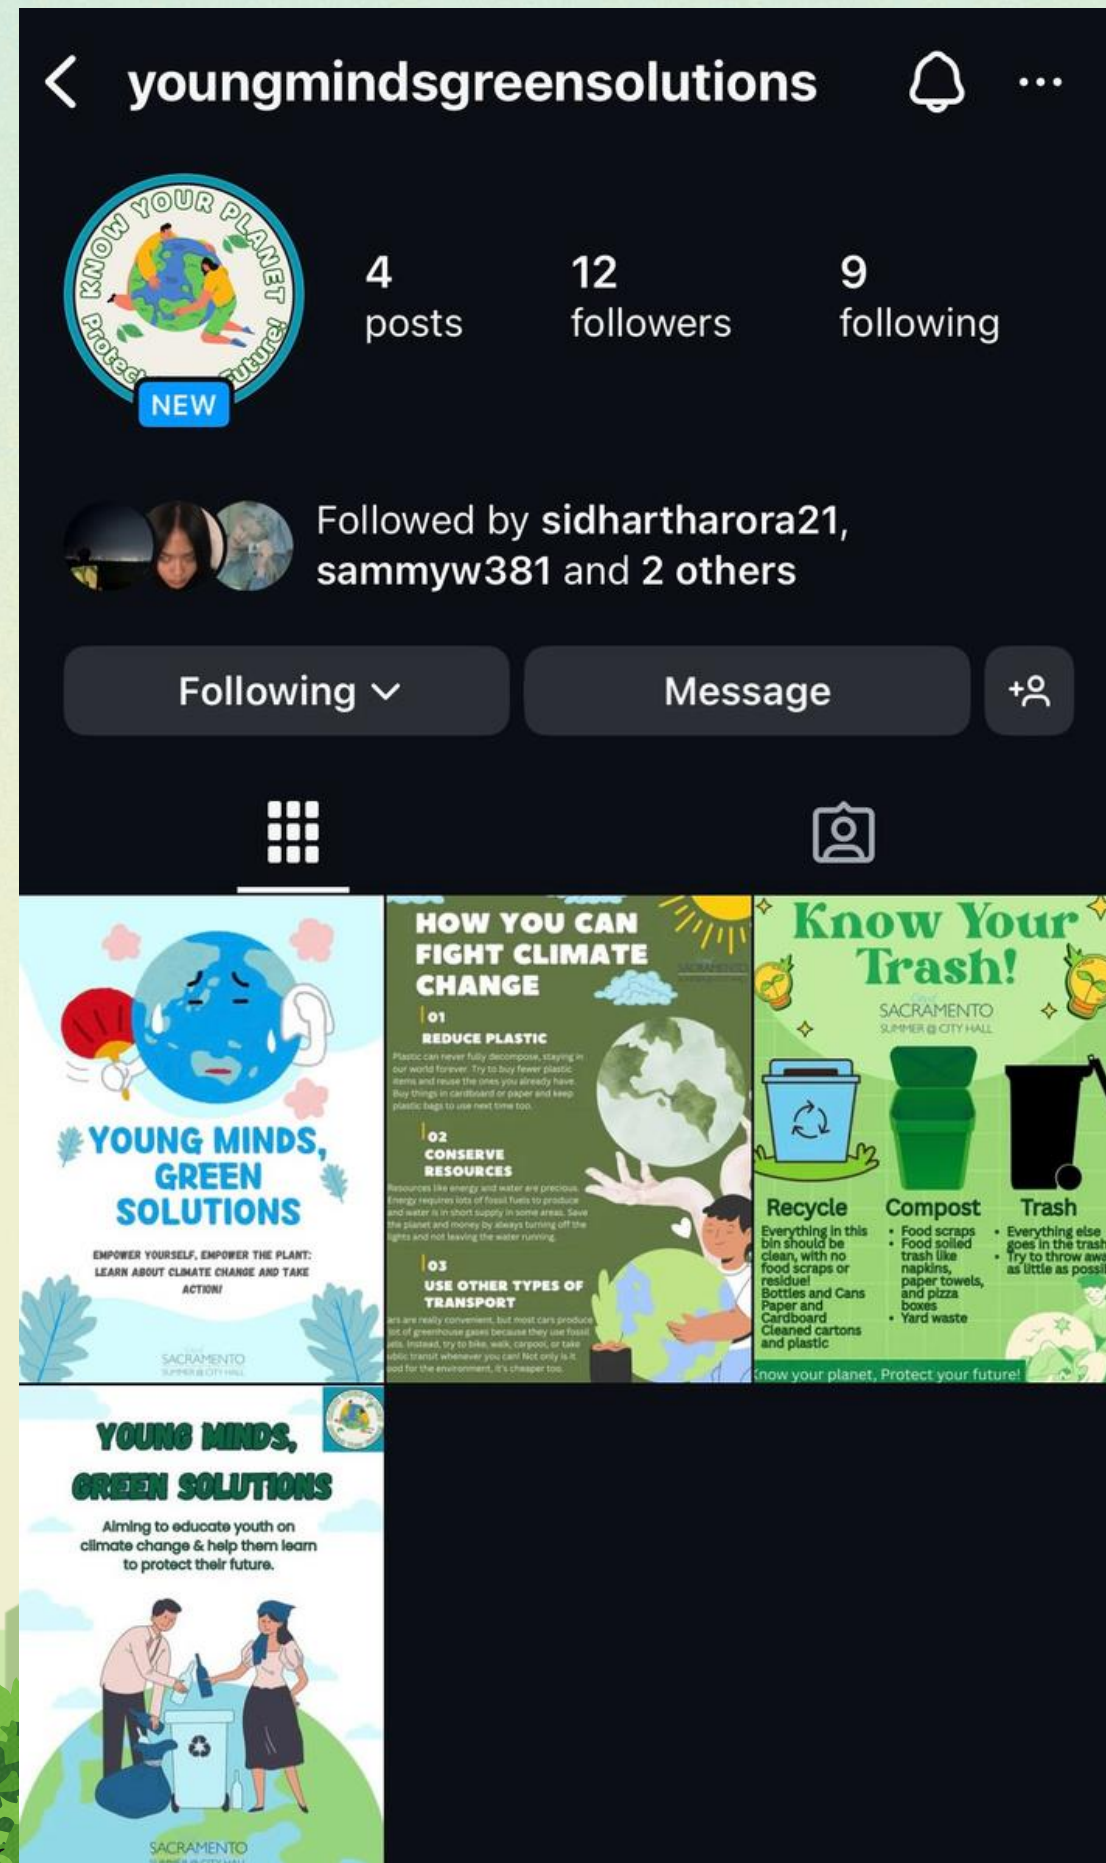

Nearly 80% of the students expressed interest in educating younger generation on climate related topics.

Action plan

- We have provided various educational materials including videos, children's books, stickers, flyers, and activities.
- These materials are specifically targeted towards young kids
- Provided at community centers and in after-school programs
- Presented at booths at community events (like Earth Day fairs, community fairs, farmers markets, and more)

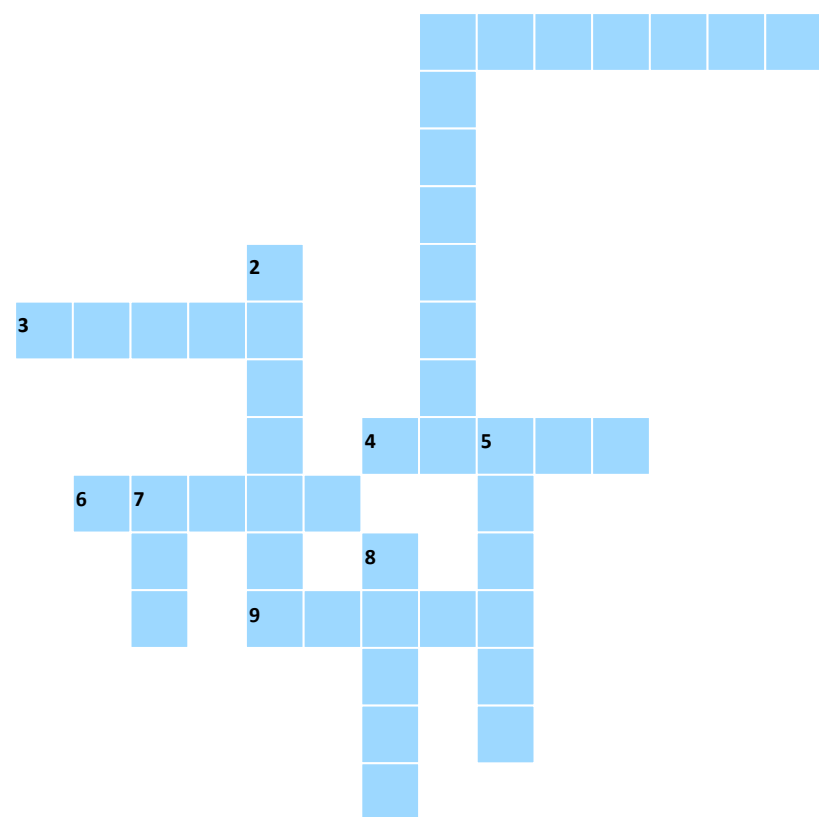

Instagram

- Instagram page created to engage with teens and young adults.
- It will consist of informational and educational content that's easy to access
- Go follow us on Instagram @youngmindsgreensolutions!

Kid's Activities

Save the Environment

Across

1. - Reduce, reuse, ___ - Pick up your ___ - Don't
3. let water run while brushing ___ - Use both
4. sides of the sheet to save more ___

Video

Conclusion

- Climate change is a serious challenge, by educating and empowering young people, we can reduce it's impact.
- Through our video, billboard, stickers and flyers we aim to make climate action fun .
- With your help, we can bring this project to community centers, events, and afterschool programs.

THANK YOU
