City Council
Sacramento, California

Honorable Members in Session:

SUBJECT: Parking Prohibitions

SUMMARY

Periodically the staff sends an updated resolution prohibiting parking at all times on specific city streets. The attached resolution has several locations that require prohibitions due to construction projects, bicycle lane placements, restriping for two-way left-turn lanes or combines segments along a street. None of these locations appear to be controversial.

BACKGROUND

Staff review indicates that these parking prohibitions should not significantly affect the residents or merchants as off-street parking is available.

A brief description of each location is as follows:

At the present time, Caltrans is doing a F.A.U. project at the I-80 freeway interchange with Arden Way. The project will provide four lanes for traffic through the interchange. It is necessary to prohibit parking on Arden Way from Blumenfeld Drive/Harvard Street to Ethan Way to utilize the street capacity to its maximum. Parking is currently prohibited between Blumenfeld and the freeway ramps on the east side of the interchange. The additional no parking signs will be posted after this resolution is approved.

On El Camino Avenue, a two-way left-turn lane has been striped, and we felt it is necessary to prohibit parking completely along the south side from Manning Street to Ethan Way. Along the north side, parking is prohibited except for segments from Van Ness to Princeton and from Albatross to Connie. This resolution compliments the no parking signs already placed.

As the result of the construction project in the Fair Oaks and Howe area, it is necessary to prohibit parking along Fair Oaks Boulevard between the H Street Bridge and the City Limits near University Avenue to fully utilize the additional street capacity. These no parking signs are to be placed in the very near future.

OFFICE OF THE
CITY CLERK

Florin Road between Indian Lane/29th Street and 24th Street has a two-way left-turn lane where occasional parking takes place. Because of the traffic volumes on Florin Road, it is deemed necessary to remove parking between Freeport Boulevard and east of the Western Pacific Railroad.

On Folsom Boulevard between Hornet Drive and Watt Avenue, bicycle lanes are planned. The segment of Folsom Boulevard between Howe Avenue/Power Inn Road and Jackson Road is a state route and both agencies are currently developing a plan for minor widening to accommodate bicycle lanes and provide a two-way left-turn lane. It will be necessary to prohibit parking for the entire distance because of available off-street parking, very little on-street parking occurs. This no parking will reduce the conflicts between moving traffic, bicyclists and parked vehicles.

Fruitridge Road between 24th Street and Franklin Boulevard has a two-way left-turn lane where parking is not prohibited now. Parking should be prohibited on both sides of the street between 24th Street and Sacramento Boulevard due to the need to provide the maximum capacity.

On Hornet Drive between College Town Drive and Folsom Boulevard, it is necessary to prohibit parking for the placement of bicycle lanes. Occasionally, parking takes place; however, off-street parking is available.

As part of the Fair Oaks and Howe improvement, parking must be prohibited on Howe Avenue between Cadillac Drive at the City Limits to Folsom Boulevard. Removal of parking will allow for restriping from two lanes to three lanes in each direction between Fair Oaks and Swarthmore. The remaining parking removal will allow full utilization of the street width as additional improvements, such as the southbound Howe Avenue right-turn lane at College Town, are constructed. Because of the volume and speed of traffic, parking constitutes a hazard. Sufficient off-street parking is available.

At the present time, there is a two-way left-turn lane on Power Inn Road from south of Folsom Boulevard to Fruitridge Road. By prohibiting parking, the occasional conflict between parked vehicles and traffic using the outside lane will be eliminated. This removal of parking should not cause any problems as sufficient off-street parking is available.

To place bike lanes along Riverside Boulevard, it is necessary to remove parking on the east side between Derick Way and Weber Way and on the west side between Rio Lane and Piedmont Drive as well as from Casilada Way to south of 35th Avenue. The parking removal should cause no problems.

The recent construction along Sacramento Boulevard between 8th Avenue and 14th Avenue has resulted in the need to update the parking controls. Currently, there are parking restrictions from 7:00 a.m. to 6:00 p.m., and this order would make the restrictions applicable on a 24-hour basis.

The construction project on Stockton Boulevard between Fruitridge Road and Elder Creek Road/47th Avenue is under way. A two-way left-turn lane will

be provided and it is necessary to prohibit parking for the entire length on both sides of Stockton Boulevard. There is presently a two-way left-turn lane between Fruitridge Road and 21st Avenue. It is necessary to prohibit parking on both sides of Stockton Boulevard in that segment to eliminate conflicts between parked vehicles and traffic using the outside lanes. The signing for prohibiting parking has been posted already between Fruitridge and Elder Creek/47th Avenue.

As part of the Fair Oaks and Howe improvements affecting University Avenue between Fair Oaks Boulevard and Howe Avenue, the street has been restriped to provide two lanes in each direction plus a two-way left-turn lane in the center. Parking is already prohibited along the east side of University. This parking removal will eliminate conflicts between parked vehicles and traffic using the outside lanes on University Avenue.

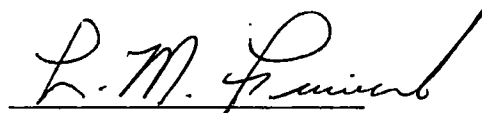

FINANCIAL DATA

The costs of the necessary signing and striping will be paid out of the operating budget of the Traffic Engineering division for non-construction projects. For City construction projects, the materials will be procured using project funds. No Council appropriation is required.

RECOMMENDATION

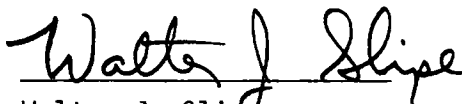

It is recommended that the City Council adopt the attached Resolution.

Respectfully submitted,

L. M. Frink
Traffic Engineer

Recommendation Approved:
