

Tax on Cannabis Cultivation & Dispensors

Without taking a position on recreational pot, I propose that two cannabis related issues be presented to the voters of the City of Sacramento.

First, should the voters approve, state-wide, recreational pot, all cannabis cultivators and dispensers be required to pay a **Safety Fee** to fund additional local area emergency services for medical, fire, and police based on the footprint and gross income of their business.

Second, all sales tax associated with the cultivation and sale of all cannabis products shall be used for the upgrade of the city's infrastructure.

Benefit to Everyone: Use of related revenues would benefit the whole community and reduce the risk to areas where the product is cultivated and marketed.

This should be put to a vote by the People

City, State Zip

Tax on Cannabis Cultivation & Dispensors

Without taking a position on recreational pot, I propose that two cannabis related issues be presented to the voters of the City of Sacramento.

First, should the voters approve, state-wide, recreational pot, all cannabis cultivators and dispensers be required to pay a **Safety Fee** to fund additional local area emergency services for medical, fire, and police based on the footprint and gross income of their business.

Second, all sales tax associated with the cultivation and sale of all cannabis products shall be used for the upgrade of the city's infrastructure.

Benefit to Everyone: Use of related revenues would benefit the whole community and reduce the risk to areas where the product is cultivated and marketed.

This should be put to a vote by the People
