Honorable Members in Session:

SUBJECT: Sewer and Water Reconstruction - "S" and "T" Alley
Between 5th and 6th Streets

SUMMARY:

The City Engineer's office has prepared plans and specifications for the subject project. This report recommends that approval be given for financing of proposed reconstruction of existing deteriorated sewer and water systems.

BACKGROUND:

According to maintenance personnel, the existing 8" combination sewer main and sewer services are in a rapidly deteriorating state. The existing water main and water services are in a similarly deteriorated state and leakage is the cause of inadequate service. High maintenance costs are encountered in attempting to keep this deteriorated system functioning.

The proposed reconstruction will consist of replacement of the existing sewer pipe, manhole, gutter drain, sewer services, water main, water services and alley pavement sections.

With the sewer line and the water line both being replaced, along with sewer and water services, the necessary trenching will seriously affect the already deteriorated surface of the alley. Six inch Portland Cement Concrete is proposed for reconstruction of the alley. Because of the potential health hazard and maintenance problems, it would be in the City's best interest to finance the proposed reconstruction project.

FINANCIAL DATA:

It is estimated that the project will cost approximately \$88,272.91. It is proposed that funding for water reconstruction be provided from the Water Fund balance in the estimated amount of \$12,337.16. It is also

proposed that funding for the sewer reconstruction portion be provided from the Sewer Fund balance in the estimated amount of \$75,935.75. Funds will be appropriated upon receipt of bids.

RECOMMENDATION:

Staff recommends that the Budget and Finance Committee recommend to the full City Council that financing be approved for the subject project, and that plans and specifications be approved and this project be advertised for bids.

Respectfully submitted,

R. H. PARKER
City Engineer

Recommendation Approved:

Jack Crist, Finance Director
